

Dynamics 365 Business Central

– Smarter Operations Start Here

Reimagine how you work—streamline operations, connect teams, and drive smarter decisions with a single, end-to-end business management solution.

Why implement Dynamics 365 Business Central?

1. Financial Management:

Accelerate closings, improve cash flow forecasts, and access real-time KPIs across all subsidiaries.

2. Warehouse management:

Optimise warehouse operations to reduce costs and ensure timely order fulfilment.

3. Supply Chain Management

Utilise intelligent automation to reduce costs, minimise stockouts, and accelerate order fulfilment.

4. Reporting and Analytics:

Use built-in analytics and reports to monitor performance and support informed decisions.

5. Project Service Management:

Plan, resource, and track projects effectively to ensure profitability and timely delivery.

6. Work smarter with Microsoft Copilot:

Harness AI with Copilot in Business Central to enhance productivity, creativity, and performance.

How Dynamics 365 Business Central transforms every part of your business.

Real-Time Financial Insight

Access cash flow, trends, and performance metrics via Excel, Power BI, and built-in reports.

Sales Integration with Outlook

Manage the entire sales process directly within Outlook for improved customer service.

Project Profitability Tracking

Monitor project status, profitability, and resource utilisation with real-time dashboards

Service Task Management

Allocate personnel effectively and gain visibility into service tasks and workloads.

Natural Language Workflow Automation

Create automated workflows using Copilot's natural language capabilities for increased efficiency.
