

Advanced Protection Cloud Gateway

As businesses increasingly rely on collaboration tools, the need for advanced security measures becomes critical. Mimecast Advanced Protection enhances your defenses with powerful capabilities such as browser isolation, email continuity during outages, and extended data retention and backup and recovery with Sync & Recover. Designed to operate seamlessly across cloud, on-premises, and hybrid environments, this plan ensures your organization stays protected against advanced threats, data loss, and disruptions. Trusted by over 27,000 customers, Mimecast provides a layered approach to email security and business continuity, keeping your operations resilient and secure.

The Advanced Protection Plan includes

Email Security - Improve email security efficacy, protecting the #1 threat vector from attacks including business email compromise, ransomware, and phishing.

Internal Email Protect - Advanced detection applied to all email traffic extends security to internal and outbound email to identify compromise and reduce impact for you and your supply chain. Simple and rapid remediation automates remediation with a single dashboard with no PowerShell required for manual intervention.

Advanced BEC - Leverage industry-leading AI to defend against sophisticated business email compromise and impersonation attacks.

Browser Isolation - Integrated, agnostic Browser Isolation providing 100% protection for advanced web threats delivered via email covering all browsers and devices.

Sync & Recover - Fast, easy data restoration makes it easy to recover from data loss and corruption from a secure and independent source.

Continuity - Maintain 100% email uptime to keep your #1 communication tool available even when Microsoft is not with integrated applications and event management.

Content Security - Enable secure collaboration with tools like Large File Send for safe file sharing, Secure Messaging for encrypted communications, and the Privacy Pack to protect sensitive data and ensure compliance. with integrated applications and event management.

Recommended Add-Ons

- DMARC Analyzer**
 Increase visibility and governance over your domains with easy-to-use reporting and analysis of who is sending email on your behalf to identify legitimate versus fraudulent senders.
- Engage**
 Engage your employees in security with micro-learning modules and phishing simulations.
- Mimecast Cloud Archive**
 Simplify long-term data management, compliance, eDiscovery, and case review.
