Terminalfour AI Search

Terminalfour Search provides a scalable, cloud-based site search capability designed specifically for higher education environments. It helps prospective students, current students, staff, and external audiences quickly find relevant information across courses, events, research, policies, and services, even during peak demand periods such as admissions and clearing.

Our Pricing:

Terminalfour Search is designed to scale with content volumes, user demand, and future requirements, including AI, providing a stable foundation that can evolve without disruptive replatforming.

The subscription fee includes:

- Application hosting
- Unlimited support tickets
- Software upgrades
- Up to one production instance
- Software warranty service
