

The Server Labs G-Cloud 15 Service Description

G-Cloud 15 Service Definition –
Atlassian Services

Ref: TSL/GCLOUD15/SERVICE/ATLASSIAN

Issue Number
1.0

Date
Jan 2026

Atlassian Cloud Services

This document provides you with a description of each of The Server Labs' Atlassian Cloud Services .

If you wish to receive further information please contact sales@theserverlabs.com

All our Atlassian services are provided as a SaaS model on our partner cloud IaaS platforms:

- AWS
- Azure
- Google Cloud Platform

If requested we can supply licenses for on-premise installations.

Jira Core

JIRA Core is the tracker for teams planning and building great products. Thousands of teams choose JIRA to capture and organize issues, assign work, and follow team activity. At your desk or on the go with the new mobile interface, JIRA helps your team get the job done.

JIRA Features include

- Issue tracking
- Project management
- Code integration
- Many add-ons

Jira Software

Plan, build and ship great products on time - team collaboration, agile planning and issue tracking in one. JIRA Agile is an add-on for JIRA that enables Scrum features such as

- Kanban charts
- Sprint planning
- Product backlogs and Sprint backlogs
- Stories, Tasks and Epics
- Project burndown charts

Confluence

Confluence is the leading commercial Wiki on the market today. Give your team one place to share, find, and collaborate on information they need to get work done.

Give your team Confluence. No email. No meetings. No problem.

Jira Service Desk

Atlassian JIRA Service Desk is a collaborative web based Service Desk to enable you to collect, service, report and solve more problems faster. With an intuitive interface, powerful SLA support, customizable queues, and real-time reporting, you'll be closing tickets in no time.

Bitbucket

Atlassian BitBucket Server (formerly Stash) provides On-premises source code management for Git that's secure, fast, and enterprise grade. Create and manage repositories, set up fine-grained permissions, and collaborate on code – all with the flexibility of your servers.

Cloud Hosting

The Server Labs can host your Atlassian tools in our partner clouds, AWS, Azure, Google or UKCloud

Atlassian Cloud

As well as the Server versions, we can supply Atlassian Cloud versions of most Atlassian products.

Atlassian Consultancy

The Server Labs provide a wide range of consultancy services around each Atlassian product, including

- Training
- Product installation and configuration
- Troubleshooting
- Development of plugins

TSL Company Profile

Founded in 2004, TSL are cloud architects and integrators.

We offer a full range of lifecycle cloud solutions and services, from consultancy, software/application development, to cloud architecture design, and integration, to fully managed services.

Our specialisations are High Performance Computing and AI/ML deployed in highly secure cloud environments, with best practice built in from day one.

Our clients include private and public organisations, with an emphasis on those processing large amounts of data in mission critical environments, particularly in the Lifesciences, Utilities, Banking, Space, Metrology and Telecoms sectors.

Well Architected

The Company's mission is:

- To provide expert services in the field of cloud architectures, High Performance Computing, and advanced cloud software engineering
- To radically improve cloud software development processes
- To help organisations achieve better business results through the correct use of cloud technologies
- To create high quality innovative cloud software solutions, providing added value to our customers

The specific value, experience and expertise that The Server Labs can provide are:

1. **Technical excellence** and capability to act as lead on architectural decisions and as technology expert in software and system subjects.
2. **Proven experience** in implementing HPC, FinOps, Cloud Security and Big Data Projects.
 - FinOps sustainable change management to enable innovation
 - Industry leading experts in high performance computing
 - Cloud security and sensitive, big data management and processing
3. **Cloud migration:** Proven track record in migrating large, complex and sensitive dataset from on-premise to cloud environments and from legacy to target cloud.
4. **Architecture experience** at software and system level.

AWS MAP and WAF certified

TSL have achieved AWS MAP competence, which is a rigorous and demanding standard to achieve and few boutique consultancies like TSL have achieved this.

Our architects and engineers are experts with an average of 10 years' experience in the planning, design and development of complex software systems. Our multinational team has been a pioneer in cloud native service, serverless computing, automation, infrastructure as code, and distributed architectures, and has the required hands-on experience in many state of the art technologies.

The Server Labs is a leader in cloud computing solutions and services, helping organisations to move to the cloud at all levels.

Ready to lead the future?
