Cloud Migration

Our Cloud Migration service helps organisations build operational foundations for a successful migration. Experienced cloud solutions architects and project managers collaborate with your team to address capability gaps, establish a Landing Zone, platforms, CI/CD pipelines, and shared monitoring and logging approaches, providing clear guidance for an accelerated migration.

Features

- Detailed business case with executive summary and cost analysis
- Addressing capability gaps identified in the assessment phase
- Building a secure and compliant cloud landing zone
- Establishing platforms for running compute workloads
- Implementing CI/CD pipelines for streamlined application deployment
- Developing shared approaches to monitoring and logging
- Providing clear guidance on migration plans and decisions
- Collaborating with your team throughout the mobilize phase
- Leveraging cloud best practices and proven methodologies
- Tailored to your public sector organisation's specific requirements

Benefits

- Accelerates your migration journey with funding from cloud providers (E.g. AWS Migration Acceleration Program Funding)
- Ensures a strong operational foundation for migration success
- Mitigates risks associated with capability gaps
- Provides a secure and compliant Landing Zone
- Streamlines application deployment with CI/CD pipelines
- Improves visibility through shared monitoring and logging approaches
- Enhances decision-making with clear migration guidance
- Leverages expertise of experienced cloud solutions architects and PMs
- Incorporates cloud best practices for a smooth migration
- Tailored to your organisation's unique needs
