

Test Automation

Ten10 provides flexible Test Automation, tailored to your needs, ranging from fully managed services to fractional SDETs integrated within your existing teams. We cover the entire automation lifecycle: from selecting the right tools for your specific project/programme, to building, enhancing and executing robust frameworks.. By integrating automation directly into your pipelines and providing team upskilling, we ensure the approach delivered is sustainable and follows industry best practice. Our goal is to avoid any vendor lock-in and increase and accelerate testing feedback loops, whilst ensuring development team velocity is increasing with confidence through maintainable, high-visibility implementations.

Features

- Test tool recommendation, proof of concept, training, implementation and strategy
- Creation of test automation functions, teams, departments
- Improve development team confidence, establishing test best practices to increase velocity
- Pan Government Experience, GDS Manual proficient
- UK-based SC and BPSS cleared quality and testing professionals, OnDemand, on/offsite
- Fully managed solutions, including building automation frameworks from scratch
- Measured success; cost control and metrics to demonstrate ROI
- Tool agnostic, focusing on the right tool for the job - Open source or proprietary tool solutions.
- Scalable, responsive service compatible with Agile and other methodologies
- Expert Automated Testing Consultants with in-depth technical knowledge
