

Cloud Performance & Scalability Assessment / Audit

Our Performance & Scalability Review package ensures your cloud environments perform optimally and scale effectively. We conduct a performance strategy workshop, perform a hands-on audit of your cloud estate, and provide a comprehensive report with quick wins, long-term recommendations, and monitoring suggestions, tailored to your specific needs.

Features

- Performance strategy workshop to define goals and KPIs
- Identification of expected traffic, growth, and historical issues
- Hands-on performance audit of cloud environments
- Identification of quick wins and optimisation opportunities
- Autoscaling configuration review and recommendations
- Appropriate resource size selection guidance
- Database query and index optimisation suggestions
- Caching opportunity identification
- Comprehensive performance optimisation report with executive summary
- Monitoring and observability recommendations
- Multi-cloud support across AWS, Azure, GCP and other platforms

Benefits

- Ensures optimal performance and scalability of cloud environments
- Aligns performance strategy with your goals and requirements
- Identifies and resolves potential performance bottlenecks
- Provides actionable recommendations tailored to your organisation
- Improves resource utilisation and cost-efficiency
- Enhances application responsiveness and user experience
- Minimises the risk of performance-related outages
- Enables proactive monitoring and issue detection
- Supports long-term performance and scalability improvements
- Leverages expert guidance for informed decision-making
