

Operational Acceptance Testing

Ten10 provides targeted operational acceptance test services that provide confidence that systems are ready for live operational use. By evaluating your systems and solutions we determine the likely risk areas and recommend the best approach. This involves shifting left where possible and ensuring alignment with budgets, delivery approach, technology and timescales. We create scenarios to ensure that internal and external applications, websites and platforms are operational and supportable.

Features

- Expert review and revision of existing, or implementation of new test approaches that align to business objectives, solution complexity, risk appetite and priorities
- Integration and collaboration with yours and your third party teams
- Support all sizes of engagement from team members, whole teams and a fully managed test capability
