

Employee Upskilling Academy

Ten10 has been delivering technical training pathways since 2013 to develop next generation IT talent and has won multiple awards for the level of the curriculums. This includes JobCrowd best companies for graduates to work for, ranking #1 in training, and #2 overall in 2025.

Ten10's Academy helps customers to overcome their technical resourcing challenges by identifying bright, passionate and technically adept talent from a wide range of backgrounds within their own workforce to join our structured, tutor led training pathways.

Our 12-week training services develop trainees via an initial six-week 'Core Training' covering IT Foundations, Three Tier Architecture, and a Programming Primer to establish a technical baseline and determine specialisations. Following this, and if required, trainees enter a 5-8 week specialist pathway in Change Management, Data Engineering, Software Engineering, or Platform Engineering.

Features

- Leverages a diverse pool of talent from within your organisations.
- Training delivered by ILM-qualified and experienced practitioners.
- Ability to tailor training to meet your exact requirements.
- Evaluation throughout training which focuses on technical and soft skills
- Training curriculum is dynamic and constantly evolving to ensure market place trends are catered for and most in demand tech skills are met
- Ongoing Learning and Development service provided, at zero additional cost.

Benefits
