

Cloud Review & Roadmap Workshop

Our Cloud Review & Roadmap Workshop is a focused, evidence-based engagement designed to help organisations understand the current state of their cloud platforms and delivery practices, identify where meaningful improvements can be made, and establish a practical roadmap to achieve them.

Unlike generic workshops or checklist-driven assessments, we work collaboratively with your team to review cloud architecture, platform maturity, cost management and delivery practices, using real data and observations from your environment. The outcome is a set of prioritised recommendations and a pragmatic strategic roadmap that supports continued delivery with confidence.

Features

- Collaborative discovery with minimal disruption to engineering teams
- Evidence-based review of cloud architecture and platform maturity
- Assessment of cost efficiency, usage patterns and optimisation opportunities
- Review of technology stack choices and cloud platform alignment
- Evaluation of modern practices including DevOps, SRE, and platform engineering
- Identification of risks, constraints and technical debt
- Prioritised, actionable recommendations with effort and impact estimates

Benefits

- Clear understanding of your current cloud architecture and maturity
- Practical insight into cost optimisation and platform efficiency
- A roadmap grounded in real data, not generic best-practice checklists
- Reduced risk through early identification of architectural and operational issues
- Improved alignment between cloud strategy and delivery goals
- Better decision making through experienced, independent review
- Increased confidence in future cloud, platform and delivery investments
- Pragmatic outcomes that support progress rather than slow it down
