# Security Operations Centre (SOC)

Our Security Operations Centre (SOC) service provides continuous monitoring, detection and response for cloud security threats, delivered as a collaborative extension of your team.

The service combines 24/7 monitoring with experienced cloud security engineers who understand your environment, helping you respond quickly to incidents, improve your security posture over time and build confidence in operating secure cloud platforms.

## Features

- 24/7 monitoring and triage of security events across cloud environments
- Human-led investigation of critical and high-priority security alerts
- Escalation and response support for confirmed security incidents
- Integration with existing logging, alerting and security tooling
- Clear, direct communication during live security incidents
- Security incident reporting and post-incident summaries
- Alignment with cloud security best practices and shared responsibility models
- Multi-cloud support across AWS, Azure, GCP and other platforms

## Benefits

- Continuous monitoring of security events across your cloud environments
- Faster detection and response to security incidents
- Reduced alert fatigue through effective triage and prioritisation
- Access to experienced cloud security engineers during incidents
- Improved confidence in handling security events
- Reduced operational risk through structured response and escalation
