

Cloud Disaster Recovery & Backup Assessment / Audit

Our Backup & Disaster Recovery Review ensures your organisation's backup and disaster recovery plans align with business and compliance requirements. Our experts catalogue critical data, conduct a hands-on assessment of your cloud workload, and provide a comprehensive report with risk analysis and recommendations tailored to your needs.

Features

- Identification of business-critical data assets
- Backup strategy for each identified asset
- Establishment of recovery objectives
- Risk profile for each data asset
- Hands-on assessment of cloud workload
- Verification of backup processes according to data catalogue
- Validation of documentation and process effectiveness
- Comprehensive disaster recovery readiness report
- Executive summary and overview of identified risks
- Architectural and technical recommendations for improvement
- Multi-cloud support across AWS, Azure, GCP and other platforms

Benefits

- Ensures critical public sector data is adequately protected
- Aligns backup and disaster recovery with business requirements
- Identifies and mitigates risks to data assets
- Provides peace of mind through thorough hands-on assessment
- Ensures compliance with relevant public sector regulations
- Optimises backup and disaster recovery processes
- Enhances organisational resilience and business continuity
- Provides actionable recommendations tailored to your public sector needs
- Improves disaster recovery readiness and response capabilities
- Supports informed decision-making with comprehensive risk analysis
