

AI Use Case Discovery & Delivery

Our AI Use Case Discovery & Delivery service helps organisations identify high-value AI opportunities and take them through to practical implementation. We work with your stakeholders to map where AI can deliver measurable benefit, assess feasibility against your data and systems, and then deliver a prioritised plan and implementation of the highest-impact use cases.

We assess opportunities across generative AI and agentic AI applications, evaluate data readiness and compliance considerations, and produce architecture recommendations, milestones and resourcing guidance. We can then build and deploy an initial implementation for selected use cases, integrating with existing systems and establishing the foundations for secure, repeatable delivery.

Features

- Discovery workshops to identify AI opportunities across business functions [OBJ]
- Data-driven opportunity mapping and use case definition [OBJ]
- Technical feasibility assessment for shortlisted use cases [OBJ]
- ROI and business impact assessment and prioritisation matrix (effort vs value) [OBJ]
- Data readiness assessment including quality, accessibility and gap analysis [OBJ]
- Privacy, risk and compliance considerations for AI applications [OBJ]
- Architecture recommendations and integration approach for priority use cases [OBJ]
- Implementation planning with milestones and resource guidance [OBJ]
- Build and implementation of an initial AI capability for selected use cases
- Validation, handover and guidance for operating and iterating on the solution

Benefits

- Clear understanding of where AI can deliver value in your organisation [OBJ]
- Prioritised AI initiatives based on effort, value and feasibility [OBJ]
- Improved confidence through data readiness and feasibility validation [OBJ]
- Reduced delivery risk through early consideration of privacy and compliance [OBJ]
- Faster progress from ideas to a working implementation, not just recommendations
- Practical architectures and integration plans aligned to existing systems [OBJ]
- Clear milestones and resourcing guidance to support delivery [OBJ]
- A working foundation to iterate towards production use cases
- Better alignment between business stakeholders, data and technical teams
- Outcomes aligned to organisational priorities and measurable impact
