Intelligent Automation

Our Ten10 experts will lead on Intelligent Automation (IA). They can introduce IA, which mimics human behaviour and is best suited for repetitive, manual, situational, and decision-oriented tasks. Our experts find IA particularly useful for our customers when dealing with unstructured data and for tasks involving machine learning and natural language processing.

Features

- Experts in how to develop, test, enhance and maintain IA based solutions
- Close working with SMEs to determine feasibility of tasks/processes being automated
- Detailed business process modelling
- POC to deliver the automation of the prioritised business processes
- Execution and support of your IA solution
- Experienced in industry leading IA tools (covering RPA, AI, low-code, etc)

Benefits

- Reduce reputational and financial risks associated with the manual processing of repetitive tasks
- Increase speed of delivery of business processes
- Improve consistency in delivery of business processes
- Reduce overheads associated with business processes; ROI tracked and reported
- Full, end-to-end ownership of automated business processes
- Post go-live maintenance of automated processes - covering upgrades, hot fixes and enhancements
- UK based SC and BPSS cleared quality and test professionals
