

Cloud FinOps Service

Our Cloud FinOps Service helps organisations gain a clear, ongoing understanding of where cloud spend is being incurred and why. Delivered as a regular review service, we work with your teams to analyse usage patterns, identify anomalies and trends, and provide practical insight into cloud costs without slowing delivery.

By processing and analysing detailed billing data, we provide clear visibility of spend across services, accounts and teams, supported by comprehensive dashboards and regular cost summaries. This enables informed decision making, better cost control and improved financial governance over time.

Features

- Ongoing analysis of cloud billing and usage data
- Processing and normalisation of billing data for consistent reporting
- Dashboards showing spend trends, patterns and cost drivers
- Identification of anomalies, unexpected spend and unusual usage
- Regular cost summaries highlighting key changes and observations
- Quarterly FinOps review sessions with experienced cloud practitioners
- Insight into how architectural and usage decisions impact cost
- Clear, plain-English explanations of cloud spend and billing behaviour
- Multi-cloud support across AWS, Azure, GCP and other platforms

Benefits

- Clear understanding of where cloud spend is incurred and why
- Improved visibility of costs across teams, services and environments
- Early identification of unexpected or anomalous spend
- Better control over cloud costs without reducing delivery velocity
- Increased confidence in cloud financial management
- More informed conversations between engineering, finance and leadership
- Improved financial governance through consistent, repeatable reviews
- Ongoing insight rather than one-off cost analysis
