

AWS Configurable Landing Zone

Offers a robust, secure, and compliant Landing Zone for your solutions on AWS. Using AWS Control Tower, it provides centralised management, security best practices, and optional features tailored to your organisation's needs. The package includes design, implementation, handover, and support.

Features

- AWS Control Tower for centralised management and governance
- Workload isolation and AWS account management
- AWS IAM Identity Center setup for access control
- Centralised billing, budgets, audit logging, and threat detection
- Security guardrails and Infrastructure as Code
- Optional integration with external identity providers
- Optional AWS Backup for centralised data protection
- Optional AWS Client VPN for secure remote access
- Optional AWS Inspector for vulnerability management

Benefits

- Solid foundation for your solutions on AWS
- Enhanced security and compliance posture for sensitive data
- Simplified management and governance of AWS environment
- Reduced operational overhead and streamlined processes
- Improved visibility and control over public sector AWS resources
- Customisable to specific public sector requirements and future growth
- Readiness for various compliance frameworks (ISO 27001, SOC 2, etc.)
- Comprehensive handover and training for public sector IT teams
- Minimum 3 months of support for smooth transition
