

Lot 2 Damage and Repair Tracker (DaRT) Service

G-Cloud 15 Cloud Software
Pricing Document

tlmNexus Damage and Repair Tracker Cloud Software Service Pricing

1. Introduction

This document is the tlmNexus Damage and Repair Tracker Service Pricing in relation to the G-Cloud 15 Cloud Software service. This Pricing is associated with the tlmNexus Damage and Repair Tracker Cloud Software Service Definition document available through the G-Cloud 15 Framework.

2. Generic Pricing Principles

A tlmNexus service does not provide an End User licence.

The on-boarding price is listed for the service and is calculated based on a single asset type and the size of the user base. This will be followed by a monthly subscription for the service based on the size of the user base.

If a customer requires a specific configuration related to their unique business requirements or integration with other systems this can be ordered through the tlmNexus Lot 3 Cloud Support service priced in accordance with our SFIA Rate Table (see Pricing Document).

It is implicit within the service that the customer has a 'permit to use' the Service for the duration of the order. Please note in the event a customer wishes to off-board from the service a notice period of 30 working days is required and the service subscription remains payable during this time. Any non-standard off-boarding will be priced according to the volume and format of the data requirements on a case-by-case basis using the SFIA day rate card.

3. Service Level Description

This is detailed in the Damage and Repair Tracker Cloud Software Service Definition document.

4. Module Pricing Description

Damage and Repair Tracker Service pricing describes the price paid for onboarding and monthly service of the Damage and Repair Tracker Service for a single asset type which may comprise multiple assets of the same type.
