Pricing – TSO Online Tools Development

January 2026

Pricing – TSO Online Tools Development

As each project will have different requirements, TSO's pricing is based on the roles and timelines required to deliver a project.

TSO offers different commercial models which will be discussed with the client at initiation.

Prices for end users will be determined depending on market factors including audience size, competition and complexity of product.

Model 1: Upfront development costs with variable ongoing fees

TSO will provide a cost model as part of initial scoping. This will include a timeline and resource plan.

We will agree an ongoing hosting and maintenance fee for when the product is developed depending on the specification and client requirements, which may include sales, marketing and customer support (order taking) for the products.

Model 2: Commercial publishing model

Where there is significant market demand for a product, TSO may bring new products to market at our own risk, free of charge for the client.

TSO covers our costs via a share of the income generated from sales of the product. Clients will receive an ongoing royalty once the initial set-up costs have been recovered.

Pricing for services will be based on the following day rates:

Function	Job title	Day rate
Data architect	Data architect	£920
	Senior data architect	£970
Enterprise architect	Enterprise architect	£970
	Senior enterprise architect	£1,020
	Lead enterprise architect	£1,125
