

On time. On brand. On point.

DeckKorateSM Exec

What do 20 hours a week on PowerPoint[®] cost? For a 10-person team, a staggering \$1 million a year¹. And that's just the operational expense. The greater cost lies in missed opportunities, when presenters lose the room to underwhelming decks with muddled messaging. In a fast-paced environment, the price of audience disconnect is simply too high.

DeckKorateSM Exec changes that. Developed as an AI-native PowerPoint add-in for enterprise teams, DeckKorate Exec helps professionals tell stories with speed, clarity, and impact. It transforms rough slides into polished, on-brand presentations with smart layouts, compelling visuals, and content suggestions, so you can focus on strategy instead of design.
