

Product Price List (EDR & ITDR)

1. EDR – Endpoint Detection & Response

Price: £5.85 per agent / per month

Description:

EDR delivers advanced endpoint protection designed to detect, investigate, and respond to sophisticated threats that traditional antivirus tools miss. Key capabilities include:

- 24/7 SOC monitoring and threat hunting
- Behavioral and anomaly-based threat detection
- Automated isolation, remediation, and forensic investigation
- Detection of persistent footholds and malicious activity

This makes EDR ideal for preventing device-level compromise while reducing alert fatigue through expert human validation.

2. ITDR – Identity Threat Detection & Response

Price: £3.25 per user / per month

Description:

ITDR protects Microsoft 365 identities by detecting and responding to identity-based attacks, including compromised credentials and unauthorized access attempts. Core features include:

- 24/7 identity monitoring and SOC-backed analysis
- Detection of account takeovers, session hijacking & privilege escalation
- Monitoring of Entra event logs for anomalies
- Detection of malicious inbox rules and business email compromise (BEC)

ITDR focuses on stopping identity-based threats—now one of the most common attack vectors in Microsoft 365 environments.
