eCase Additional Features

eCase Capture Pricing

eCase Capture increases the efficiency of triaging and case creation by removing the manual steps required for logging and allocation of new cases. It provides a comprehensive set of case-type-specific webforms that are fully integrated with eCase and work in combination with eCase Capture's automation engine to save valuable time and effort. By automating these tasks, case processing becomes more efficient and less error-prone, with data captured in a more structured and consistent way.

In addition, correspondents benefit from a faster and more intuitive submission process. Using eCase Capture provides a significantly better user experience and saves time compared with submitting requests by email or letter.

Secure Share Pricing

Secure Share enables sensitive information to be securely and digitally sent to requesters, so eliminating the need to print and securely post or courier responses, which in turn delivers significant cashable savings. In addition, Secure Share can both set information access expiry dates and revoke access to information sent out in error. It also has a comprehensive audit log to see if information has been accessed and when. Combining these features makes Secure Share securer than using email and more cost effective than most secure email products.

eCase Assist operates using various AI tools which require analysis of source information. The measure of volume in these operations is tokens (fragments of information). Column 2 is the number of included tokens, based on assumptions of normal usage. Columns 3 and 4 show the increased number of available tokens along with the additional fee payable to cater for this increased volume. Columns 5 and 6 show a further increased number of available tokens along with the additional fee payable to cater for this increased volume. The final column shows the ad-hoc cost of exceeding any inclusive number of tokens.

Table 6. eCase Assist Annual Bundle Token Pricing Matrix

Case Volumes	Number of Tokens included – no additional fee	Increased Tokens – Level 1	Level 1 Fee	Increased Tokens – Level 2	Level 2 Fee	Overage (Per 1m tokens)

Multi-year Savings Options

Table 10. eCase Multi-year Subscription Savings Pricing Matrix

Contract Length	eCase Basic	eCase Plus	eCase Advanced	eCase Premium
3 Years	Not Available	Not Available	2%	4%
4 Years	Not Available	Not Available	4%	8%

The multi-year discount will be applied where an agreement is entered into for 3 or 4 year term, should the option to terminate be actioned during the agreed term the difference between the full subscription price for the period of usage and the discounted amounts charged to the termination date will be invoiced to the customer.

Enhanced Configuration Support Services

If special configuration is needed to an eCase environment, customers may need additional support to ensure the changes are maintained and regression tested against future versions and upgrades of eCase. We will maintain a dedicated system test environment with your configuration options installed and will run release tests against it.

Not all configuration work will require enhanced configuration support. When scoping out your configuration work we will identify and agree any additional support costs with you before committing to the work.

The amount of annual support needed will depend on the complexity of the configuration and size of installation. Therefore, each enhanced configuration support service will be costed individually.

Additional Storage

Each subscription size has its own storage capacity. Extra storage can be purchased, if required, at the rate detailed in the Table 11.

Table 11. eCase Service Model Storage Allowance in Gigabytes and Additional Annual Storage Costs

Storage Allowance per Case Volume	eCase Basic	eCase Plus	eCase Advanced	eCase Premium

eCase Enhanced Configuration Services

Should any enhanced configuration services be required to a customer's eCase environment, this will be completed on a time and materials basis¹ (see Table 12 for Fivium's developer day rate card).

Table 12. Developer Day Rate Card

Grade	Enhanced Configuration Services Day Rate
Developer	£750
Junior Consultant	£875
Consultant	£1050
Senior Consultant	£1,150
Lead Consultant	£1,250
Principal Consultant	£1,450
Managing Consultant	£1,600

¹Based on a 8- hour working day between Monday to Friday (excluding national holidays). Travel, mileage and subsistence included within day rate inside of the M25. Payable at department's standard T&S rates outside M25

Training

The successful introduction of any new system into an organisation generally requires training, therefore Fivium recommend that new customers undertake a minimum of 3-4 days (depending on the complexity) of 'Train the Trainer' training (per case type) which includes Superuser training. Training rates are detailed in Table 13.

Table 13. Training Services Rates²

Number of Attendees per Session	Full Day	Half Day
Up to 3	£1,320	£858
4	£1,650	£1,073
5	£1,980	£1,287
6	£2,310	£1,502
7	£2,530	£1,645
8	£2,750	£1,788
Per Attendee over 8	£300	£250

"For me, there are many useful functions that I've been able to adopt from the training. One example is using eCase emails to send out disclosure documents and expanding our use of the redaction functionality, along with the ease of reporting that gives us. Overall, there have been lots of small and simple time savings and all of these all add up."

Anabel Raszpla, Senior Information Rights Manager, UKRI

² Based on a 4-hour half day or 8-hour working day between Monday to Friday (excluding national holidays). Travel, mileage and subsistence included within day rate inside the M25. Payable at department's standard T&S rates outside M25

Email Address	enquiries@fivium.co.uk
Website	www.fivium.co.uk

Fivium also deliver a wide range of digital applications services, so ask us about this too.

"eCase has been a godsend. It's been a lot easier to see the whole process from start to finish. It is like having another member of the team; with it, we are now able to spend more time doing higher-value work (such as redacting large and complex document sets) rather than worrying about the basic processes".

Charlotte Spencer, Senior Information Governance Officer, North Lincolnshire Council
