

CIRRUSlocate™ Gazetteer Service

AtkinsRéalis

What We Do

CIRRUSlocate™ from AtkinsRéalis is a gazetteer service providing flexible, secure, and efficient access to over 72 million address records for Great Britain. Built on open-source software, CIRRUSlocate™ provides a unique, easy and cost-effective solution for all gazetteer requirements.

CIRRUSlocate™ from AtkinsRéalis is a geographical directory providing flexible, secure, automated and efficient access to addressable and non-addressable locations across Great Britain to facilitate service provision and spatial analysis.

Why us?

Effective management of geospatial information is fundamental to the success of projects across the private and public sectors; underpinning a wide range of activities, from sustainable development, conservation and environmental monitoring to infrastructure planning and implementation, or asset management.

AtkinsRéalis specialise in the capture and use of geospatial data developing geographical information applications to enable our clients to make the most of their spatial data to realise the full benefits of GIS through our tools, professional advice, support, management, and maintenance services.
