THINKING
BEYOND
LIMITATIONS

We're Kainos

Formed in 1986, we set about finding the best people to tackle the most difficult digital work. We fostered a culture where people truly care for each other and the world around them.

Our reputation for software engineering and problem-solving was quickly established, and our customers started to view us more as their colleagues

We're much bigger now, helping organisations across the globe to navigate change in more ways than ever. But some things never change, like our commitment to our people, delighting our customers, and our technical ability

Some say we're leading a quiet revolution in digital, but if you ask us, we're just doing our bit to make the world a little bit better.

Greener Software Accelerator

Establishes baseline carbon emissions (CO₂E) for a service. We evaluate Green Software maturity, providing recommendations to implement sustainable development practices, covering technology, people, and processes.

A tailored report provides insight to enhance digital sustainability metrics and support carbon reduction in line with Net Zero or Science Based Targets (SBTi).

Features

1. Carbon Emissions calculation based on SCI standard for selected workloads.
2. Suitable for Azure/AWS and Google Cloud Platform (GCP) based workloads
3. Migration Sustainability assessment
4. Data quality assessment and remediation recommendations
5. Maturity Assessment leveraging our GreenGauge Framework
6. Technology recommendations to improve cloud sustainability, aligned to FinOps principles
7. Repeatable process to calculate service level emissions
8. Roadmap to improve Sustainable development approaches
9. Development of GreenOps operating model improving carbon awareness
10. Staff enablement in sustainable software development practices

Benefits

1. GHG emissions value for your nominated service, covering scopes 1, 2 & 3
2. Sustainability related data improvements
3. Deeper insight into your cloud services.
4. Facilitates sustainability reporting requirements.
5. Reduced cloud waste
6. Cloud cost savings identified
7. Raised awareness of sustainable development practices.
8. Sustainability related technology optimisations
9. Actionable recommendations to improve Green Software development practices
10. Apply intelligent scheduling and carbon shifting to reduce carbon impact.

Greener Software Accelerator

A structured process with clear deliverables to improve your organisations sustainable development practices. We work with you to first identify a suitable service to calculate emissions. We also assess your organisation's current sustainable development maturity and provide clear, actionable insights and recommendations on how to improve your sustainability metrics and development practices.

Service scope

Delivery of a tried and tested process:

Workshop with sponsor: Understand the key drivers, agree high-level objectives, identify the service in scope and the SMEs required to facilitate the work.

Data Collection:

1. Discussions with the Service SMEs to identify the software boundary, functional unit and time period in scope for the calculation.
2. Assess the available data to help identify and agree a suitable calculation approach.
3. Leverage GreenGauge framework to gather sustainable development assessment data through workshops with existing software delivery teams
4. Assess existing collateral for sustainability within the organisation. This includes policies, KPIs and any existing reporting

Benchmarking and Improvement plan:

1. Calculate emissions for service in scope
2. Calculate sustainable development maturity score from GreenGauge framework assessment
3. Review architecture and outline recommendations to improve service specific emissions
4. Review Maturity Assessment and create opinionated improvement plan, with roadmap and high-level stories.
5. **Provide report** – A report detailing the baselined emissions for the service in scope, outlining the methodology followed, as well as the Sustainable Development assessment score.

The report outputs will be tailored to your requirements however it will address the following areas:

1. **Technology:** Recommendations to improve sustainability metrics through service choice, service placement and architectural changes. May also include right sizing and other waste reduction strategies.
2. **Enablement:** Sustainable development practices, Governance recommendations.
3. **Operational:** KPIs, dashboards,

This service can be applied at any stage in your organisations' cloud journey. The process will be tailored to ensure it is relevant to what the current requirement is and is designed to be applicable at any maturity level. This service can be used to assess your organisations' maturity in sustainable development and provide actionable insights to facilitate improvements.

We can perform this function for you, or work with your staff to upskill them to build an internal capability which will allow you to take control of your own cloud costs going forwards.

Where possible, we will also identify opportunities to optimise costs for your cloud platform and provide high level recommendations as to how you can start to include related metrics in your organisation's cloud operating model.

This approach can also be used to baseline services within an existing data centre, and then calculate cloud-based emissions to highlight the improvement from migrating to cloud.

Workday

Kainos is a Workday **phase one prime status partner** in all European, North American and Asia Pacific markets. We have worked with many public and private sector customers of various sizes and scale in over **40 countries worldwide**.

Partner Since 2011

We are the only certified Workday Services, Technology and Extend partner globally.

Workday Services

Full range provider from pre-deployment consulting, implementation and support.

650+ Customers

We have deployed to over 650 customers and are a proud Workday customer also, using HCM, Financials, Recruitment, Planning and PSA to run our business.

Workday Public Sector

We have worked with many UK Public Sector customers with their initial deployment, post-deployment support and adoption of new modules.

Kainos Smart

Our product is deployed to 500+ customers globally saving them 1000s of testing hours.

900+ Consultants

Hold over 2,700+ Workday certifications covering all areas of the platform.

65 million

citizens positively impacted
by services **built by Kainos**
for the UK Government

Every driver & every car on the road
Every piece of work to fix roads
Every court case & every prisoner
Every home helped with help-to-buy
Every passport & renewal application
Every COVID test sent out
Every COVID test result
Every user of the NHS App

Every voter registered
Every company opened & closed
Every UK civil servant trained
Every piece of produce grown in the UK
Every thing imported & exported to the EU
Every benefit fraud prevented
Every body's pension details

Our Social Values and commitment to HM Government strategy

Education & Capability Building

We empower people through technical and behavioral learning programs, academies, and outreach projects, fostering skills development and inspiring future technology leaders across communities and organisations.

Social Responsibility

Tackling workforce inequality and ensuring equal access to technical and vocational education, through our Academies, Camps and Earn as you Learn schemes.

Innovation & Future Readiness

Driving continuous improvement through technology

Health, Wellbeing & Accessibility

We support colleagues' physical, emotional, and career wellbeing through initiatives, guidance, and inclusive design, ensuring equal access, experiences, and compliance for all users with diverse needs.

Climate Action & Sustainability

With a comprehensive sustainability strategy underway, we will be a Carbon Net Zero company by 2030.

Equality, Diversity & Inclusion

Maximising service experience for citizens and civil servants by delivering projects with diverse teams, underpinned by our BAME, LGBTQIA+ and female communities.

The Code of Ethics

We are guided by our 6 ethical principles.

Wellbeing

We protect the wellbeing of our staff, customers and communities.

Equality

We improve access and inclusion and minimise bias.

Transparency

Our decisions are traceable and accountable.

Integrity

We hold ourselves and others to ethical standards.

Environment

We act responsibly towards the Earth and its resources.

Initiative

We take initiative to deliver social value and positive impacts.

BCDR and Exit Plan

Business Continuity and Disaster Recovery (BCDR)

A Business Continuity Plan can be provided if required. This shall set out the arrangements to be invoked in the event of an actual or perceived threat to business continuity, to ensure continued operation of the system and continuity of the services provided by Kainos pursuant to the Prime Agreement and shall include: the alternative processes, options and responsibilities that may be adopted in the event of a failure or disruption to the system and/or services provided by Kainos pursuant to the Prime Agreement; and the steps to be taken by Kainos upon resumption of the system and services provided by Kainos pursuant to the Prime Agreement in order to address any prevailing effect of the failure or disruption including a root cause analysis of the failure or disruption.

Exit Plan

An Exit Plan can be provided if required to detail the steps that would be carried out to ensure smooth transition of Kainos services to a new supplier. The steps outlined in the Exit Plan will help mitigate against any disruption to the service during the transition period. It is assumed that any new supplier will themselves have a procedure they wish to follow during the transition period, and as such the steps in this Exit Plan will serve as a checklist for the new supplier to ensure all key areas of the transition have been covered. The Exit Plan will therefore be subject to refinement should it be exercised.
