THINKING
BEYOND
LIMITATIONS

We're Kainos

Formed in 1986, we set about finding the best people to tackle the most difficult digital work. We fostered a culture where people truly care for each other and the world around them.

Our reputation for software engineering and problem-solving was quickly established, and our customers started to view us more as their colleagues

We're much bigger now, helping organisations across the globe to navigate change in more ways than ever. But some things never change, like our commitment to our people, delighting our customers, and our technical ability

Some say we're leading a quiet revolution in digital, but if you ask us, we're just doing our bit to make the world a little bit better.

Application Modernisation

Reimagine applications using our unique, AI-assisted, agentic transformation approach to better meet user needs, become more data-driven, and adopt secure, scalable, cost-effective, sustainable cloud-native architectures.

Identify optimal modernisation pathways and accelerate transformation with latest Generative AI technologies - enabling rapid Software-as-a-Service(SaaS) transition, reducing technical debt, and delivering future-ready solutions.

Features

1. Access industry-leading capabilities across data, AI, cloud and product design.
2. Reimagine applications with scalable, SaaS-first delivery models.
3. Cost-optimised solutions using proven well-architected cloud patterns.
4. CI/CD and IaC automation enabling frictionless deployments.
5. Maintain interoperability with dependent systems and government services.
6. Cloud-native, PaaS, and serverless-first for built-in scalability.
7. Aligned with GDS Technology Code of Practice and standards.
8. Iterate quickly and incrementally modernise using agile methods.
9. Aligned with NCSC security principles e.g. GovAssure ready.

Benefits

1. Accelerate migration from legacy using Generative AI and LLM technologies.
2. Simplify hosting and reduce maintenance by adopting cloud-native managed services.
3. Mitigate risks associate with legacy or out-of-support software.
4. Generate transparent TCO model to support modernisation business case.
5. Decoupling of monolithic applications into modern micro-service architectures.
6. Embedded of Green Software Practices to reduce carbon/environmental impacts.
7. Evergreen deployments(patching/features/updates etc) through Continuous Delivery.
8. Aligned with latest accessibility frameworks including WCAG2.2.
9. Co-Delivery with expert practitioners with multi-disciplinary domain expertise.
10. Foster innovation at speed and scale whilst reducing technical debt.

10. Enabling your team through Co-Delivery and continuous upskilling.

Application Modernisation

The Kainos application modernisation methodology is a proven process to first identify priority areas for modernisation aligned to your business objectives and then enable rapid execution using agile techniques.

Application Modernisation Methodology

To us, successful application modernisation means working in partnership with you to define the optimal modernisation path and enable your teams through co-delivery.

Discovery & Launchpad

We start with rapid service-led discovery, assessing functionality, integrations, data, and technology concerns such as programming languages and deployment models.

Our holistic approach spans engineering, platforms, service design, product, and testing. Using agentic, Generative AI-assisted analysis, we create a modernisation roadmap with a launchpad.

A launchpad is an initially delivered 'thin-slice' of functionality to demonstrate the viability of the recommended approach.

Co-Delivery

We create, refine, and estimate prioritised user stories to enable modernisation. Our preferred approach is working as one team, with our engineers and architects embedded alongside yours to share knowledge, upskill, and overcome challenges collaboratively. This includes applying agentic, AI-assisted methods for code analysis, refactoring, and automation.

We embed sustainability practices, align with NCSC security principles and GDS standards, and enable evergreen deployments through CI/CD and Infrastructure-as-Code. Our co-delivery model ensures your team gains hands-on experience while reducing dependency on legacy skills. Alternatively, we can provide a full team to deliver modernisation on your behalf.

Workday

Kainos is a Workday **phase one prime status partner** in all European, North American and Asia Pacific markets. We have worked with many public and private sector customers of various sizes and scale in over **40 countries worldwide**.

Partner Since 2011

We are the only certified Workday Services, Technology and Extend partner globally.

Workday Services

Full range provider from pre-deployment consulting, implementation and support.

650+ Customers

We have deployed to over 650 customers and are a proud Workday customer also, using HCM, Financials, Recruitment, Planning and PSA to run our business.

Workday Public Sector

We have worked with many UK Public Sector customers with their initial deployment, post-deployment support and adoption of new modules.

Kainos Smart

Our product is deployed to 500+ customers globally saving them 1000s of testing hours.

900+ Consultants

Hold over 2,700+ Workday certifications covering all areas of the platform.

65 million

citizens positively impacted
by services **built by Kainos**
for the UK Government

Every driver & every car on the road
Every piece of work to fix roads
Every court case & every prisoner
Every home helped with help-to-buy
Every passport & renewal application
Every COVID test sent out
Every COVID test result
Every user of the NHS App

Every voter registered
Every company opened & closed
Every UK civil servant trained
Every piece of produce grown in the UK
Every thing imported & exported to the EU
Every benefit fraud prevented
Every body's pension details

Our Social Values and commitment to HM Government strategy

Education & Capability Building

We empower people through technical and behavioral learning programs, academies, and outreach projects, fostering skills development and inspiring future technology leaders across communities and organisations.

Social Responsibility

Tackling workforce inequality and ensuring equal access to technical and vocational education, through our Academies, Camps and Earn as you Learn schemes.

Innovation & Future Readiness

Driving continuous improvement through technology

Health, Wellbeing & Accessibility

We support colleagues' physical, emotional, and career wellbeing through initiatives, guidance, and inclusive design, ensuring equal access, experiences, and compliance for all users with diverse needs.

Climate Action & Sustainability

With a comprehensive sustainability strategy underway, we will be a Carbon Net Zero company by 2030.

Equality, Diversity & Inclusion

Maximising service experience for citizens and civil servants by delivering projects with diverse teams, underpinned by our BAME, LGBTQIA+ and female communities.

The Code of Ethics

We are guided by our 6 ethical principles.

Wellbeing

We protect the wellbeing of our staff, customers and communities.

Equality

We improve access and inclusion and minimise bias.

Transparency

Our decisions are traceable and accountable.

Integrity

We hold ourselves and others to ethical standards.

Environment

We act responsibly towards the Earth and its resources.

Initiative

We take initiative to deliver social value and positive impacts.

BCDR and Exit Plan

Business Continuity and Disaster Recovery (BCDR)

A Business Continuity Plan can be provided if required. This shall set out the arrangements to be invoked in the event of an actual or perceived threat to business continuity, to ensure continued operation of the system and continuity of the services provided by Kainos pursuant to the Prime Agreement and shall include: the alternative processes, options and responsibilities that may be adopted in the event of a failure or disruption to the system and/or services provided by Kainos pursuant to the Prime Agreement; and the steps to be taken by Kainos upon resumption of the system and services provided by Kainos pursuant to the Prime Agreement in order to address any prevailing effect of the failure or disruption including a root cause analysis of the failure or disruption.

Exit Plan

An Exit Plan can be provided if required to detail the steps that would be carried out to ensure smooth transition of Kainos services to a new supplier. The steps outlined in the Exit Plan will help mitigate against any disruption to the service during the transition period. It is assumed that any new supplier will themselves have a procedure they wish to follow during the transition period, and as such the steps in this Exit Plan will serve as a checklist for the new supplier to ensure all key areas of the transition have been covered. The Exit Plan will therefore be subject to refinement should it be exercised.
