Cloud Software – Forensics Cloud Software Pricing Document

This Pricing Document applies to the following services:

- PwC Quantexa Powered Third Party Risk Management

The pricing below sets out the applicable pricing and day rates for specialist roles delivering the Quantexa implementation and advisory services named above, aligned to the specific requirements of the buying organisation.

In delivering Quantexa-based solutions, in addition to any underlying software licence costs agreed separately with Quantexa, professional services fees will be incurred for activities such as solution design, data integration, configuration, model development, testing and deployment. Hosting and infrastructure costs are not fixed and will vary depending on the scope, complexity and specific technical requirements of the Quantexa configuration, including factors such as data volumes, performance requirements, environments required and security controls.

In most circumstances, prior to implementation activities commencing, an initial discovery or assessment phase will be undertaken to confirm business objectives, data availability, architecture considerations and delivery approach. This ensures that the Quantexa platform is configured in a way that is proportionate to the use case, data complexity and operating environment.

The provisioning of the Quantexa platform, integration of initial data sources and configuration of core analytics and workflows typically takes place over a period ranging from several days to a number of weeks, depending on scope and complexity. Ongoing support, optimisation and enhancement services can be provided on an as-required basis by our Quantexa-accredited specialists.

This document provides the day rate card and pricing approach applicable to all of the above services. A range of rates is provided to reflect the breadth of roles and experience levels available to deliver the services, ensuring that the skills and seniority of resources deployed are appropriately matched to the business needs of the buying organisation.

Where the Buyer requires Ancillary Services under a Software as a Service Lot 2b Call-Off Contract, Charges for such Ancillary Services shall be calculated in accordance with the rates set out in the applicable Ancillary Services Rate Card contained in this Pricing Document, unless the Parties agree otherwise. All rates exclude VAT and expenses.

Job Role	PwC Ancillary Services Maximum Onshore Rate	PwC Ancillary Services Maximum Offshore Rate

Service Specific Technical Pricing

The rates below set out the applicable technical rates. Any additional services are charged in line with the daily rate card.

Type	Service Specification	Service Cost Description	Unit rate
Quantexa License	Quantexa platform software license	Licence costs are dependent on the specific Quantexa modules, use cases, data volumes and deployment model. The licence may be contracted directly with Quantexa or, in certain circumstances, transacted via PwC. In all cases, licence pricing is determined based on the agreed scope and requirements and is not included within this rate card.	NA but information provided for transparency.
Hosting & Infrastructure	Cloud hosting and infrastructure required to deploy and operate the Quantexa platform	Hosting and infrastructure costs vary depending on data volumes, number of integrated data sources, analytics deployed, environments required, and performance and security requirements. For indicative purposes only, a recent public sector deployment involving a single environment, approximately 100 million rows of third-party data, 10 million rows of internal data and circa 15 analytics resulted in hosting costs in the region of £8,000 per month. Actual costs will vary based on agreed scope and non-functional requirements.	Based on client requirements.

PwC Rate Card Assumptions

1. Supplier Staff will work an eight-hour day exclusive of travel & lunch.
2. Supplier Staff will work a five-day week, Monday to Friday excluding National Holidays
3. Travel costs within the M25 are included in the day rate. Travel outside of the M25 will be billable to the customer department at an agreed standard rate which may be set out in the Call Off Contract or otherwise agreed between the Parties.
4. For data hosting, the volume of data being hosted is calculated using the storage space consumed by the information held within any native or image files associated with the data, where each document must require a native.
5. Contracts Data Extraction, Data Breach and Processing do not need to be applied to all documents that are loaded and hosted by the service, only those where data needs to be analysed and extracted via the specialist applications.
6. If required we can provide a Private Cloud instance for specific security requirements, pricing is based on commitment of user licences and number of instances.
7. The Supplier is willing to discuss client-specific requirements which may result in bespoke pricing arrangements.
8. Where the Buyer requires Ancillary Services under a Software as a Service Lot 2b Call-Off Contract, Charges for such Ancillary Services shall be calculated in accordance with the rates set out in the applicable Ancillary Services Rate Card contained in this Pricing Document, unless the Parties agree otherwise.

Confidential. This document does not constitute a Call-Off Contract for Services with PricewaterhouseCoopers LLP. Where we are engaged to provide Services, our Services will be governed by a subsequent Call-Off Contract that may be entered into between us. If you receive a request under freedom of information legislation to disclose any information we provided to you, you will consult with us promptly before any disclosure. All information contained in this document or otherwise provided or made available as part of any Award Procedure is confidential and may not be disclosed to anyone else without our prior consent.
