

Health & Safety Package for Education

Join up health & safety across your schools and campuses

WHY A DEDICATED PACKAGE FOR EDUCATION MATTERS

Education environments face unique and varied risks. From classrooms, science labs and workshops to sports facilities, trips, and contractors, you need a consistent way to manage health and safety across very different activities and sites.

Spreadsheets, paper forms and separate systems in each institution make it hard to get a clear picture of risk, performance and compliance. It's difficult to see which actions are outstanding, where incidents are rising, or how well policies are being followed in each setting.

The AssessNET Health & Safety Package for Education gives you a common framework and toolset that works for individual schools and central teams, so everyone is working in the same way, and information can be shared and compared easily.

KEY FUNCTIONS

A single, cloud-based platform

All participating institutions and sites access AssessNET through a secure, cloud-hosted platform. Central and local users see the same up-to-date information, with permissions tailored to roles and responsibilities.

Core modules for everyday safety management

Bring together key modules such as Risk Assessment, Incident & Accident Reporting and Audit & Inspection, plus optional tools like Contractor Management, CoSHH, Fire Risk Assessment and more – in one joined-up system.

Templates tailored for education

Use standard templates and question sets designed for common education scenarios, such as classroom and playground risk assessments, trip and visit checks, science and DT activities, and routine site inspections while keeping the flexibility to adapt them for your own policies.

Consistent recording and follow-up

Capture incidents, hazards, inspections and assessments in a structured way, then create and track actions through to completion. Central dashboards show which schools are up to date and where support or escalation may be needed.

Central oversight with local ownership

Allow schools to manage their day-to-day health and safety tasks, while giving trusts a clear, real-time view of trends, compliance status and outstanding actions across the whole portfolio.

PROACTIVELY MANAGE SAFETY IN EDUCATION

AssessNET is trusted by organisations across the UK to manage health, safety and risk in a consistent, auditable way. The Health & Safety Package for Education brings that capability to schools, academies, colleges and universities in a format that reflects the realities of education settings.

By joining up incident reporting, risk assessments, audits, training and actions, you can move from reactive problem solving to proactive improvement protecting pupils and staff, supporting wellbeing and giving leaders the assurance they need.
