

Enterprise Cloud

Power your organisation with Enterprise Cloud Your resilient, virtual data centre.

In today's dynamic business environment, flexibility is essential. SCC Enterprise Cloud ensures your organisation operates seamlessly, whether you require additional compute resources, bursting capabilities, or extra storage space but without the hassle of having to build and manage your own platform: we'll do it for you, while also delivering proactive support 24x7. Hosted in SCC's Tier 3 UK Datacentres SCC Enterprise Cloud is part of our wider hybrid cloud allowing you to leverage the agility of our modular Cloud Managed Services portfolio, additional platform functionality and the expertise of our highly trained cloud engineers.

Benefits of SCC Enterprise Cloud

Self-Service

Integration with SCC Vision portal provides self-service management and monitoring of your data. You can access up to date reports and managed data protection in real time.

High Performance

Built on high performance compute and NVMe storage technology, our platform enables your business applications to perform optimally.

Deployment Options

We can adapt to your changing business needs with multi and single tenant deployments options available so that the solution aligns to your goals.

Additional Services

A wide range of additional services are available including Backup as a Service and Disaster Recovery as a Service, along with a comprehensive portfolio of cloud and cyber managed services.

Scalability and Flexibility

With pay-as-you-go or committed contracts available, our platform enables flexibility for your organisation, whether you need to rapidly expand your estate or reserve resources.

24/7/365

Support from our highly skilled operations team provides expert support around the clock.

High Availability

Designed with high availability in mind from the outset, with redundancy built into the platform and hosted in our Tier 3 datacentres.

Data Sovereignty

Our platforms run out of SCC's UK datacentres, providing data sovereignty and privacy so you can have greater control of your data.

Enterprise Cloud

VISION

Cost transparency that builds trust

SCC Vision is the all-in-one solution that allows you to manage and optimise your costs with ease.

- Gain a clear view of the costs associated with your data initiatives.
- Get granular visibility into usage and spend to make informed decisions and optimise your budget.
- Maintain control, avoid surprises, and achieve measurable ROI.

How you'll benefit from SCC Vision:

Get Cloud Clear

Drive efficiencies and effortlessly modernise with status overviews and recommendations.

Feel Cloud Confident

Give users confidence in the integrity and security of your cloud with robust data protection.

Achieve Total Cloud Control

Take control with complete visibility of your cloud environments and optimised Azure resource management.
