Why use our FinOps Pathfinder?

Cost Optimisation: Immediately understand key areas for improvement for short term success.

Enhance Visibility: Gain a clear vision on how to reach FinOps maturity and continuously improve.

Collaboration: Connect your teams and inspire collaboration to improve your cloud financial management capability.

Focus on What Matters Most: Use our expertise and knowledge, freeing up your team to drive your business forward.

Strategic Decision-Making: Support informed decision-making with comprehensive data and analysis on cloud investments.

Performance Improvement: Helps measure and improve the effectiveness of FinOps practices.

How does it work?

We will conduct a 1-day workshop with key stakeholders from your business. Together, we will explore the fundamental pillars of FinOps and assess your organisation's baseline maturity. Based on our findings, we will present recommendations and insights and provide an optimisation roadmap tailored to your organisation. Finally, we'll offer strategic guidance for the future based on a prioritised action plan.

Who is this suitable for?

CIOs and CTOs

Strategic advice and assessments for aligning your cloud strategy with business goals.

IT Managers

Insights on managing spend, optimising costs and reaching budgeting goals.

CFOs

Understanding of Azure solution billing and how to optimise in line with your strategy.
