

Application Modernisation Service

From Legacy To Leading-Edge

SCC's Application Modernisation service helps organisations transform outdated, costly, and inflexible legacy applications into secure, scalable, and cloud-ready solutions. By leveraging modern development practices, cloud technologies, and automation, SCC enables businesses to improve agility, reduce operational costs, enhance security, and deliver better user experiences. The service covers the full journey—from advisory and migration to ongoing management—ensuring your applications support current and future business needs.

Key Benefits

Accelerate Innovation

Increase deployment speeds and drive business agility.

Reduce Costs

Lower maintenance and operational costs with modern architectures.

Enhance User Experience

Adapt quickly to changing customer needs and technology trends.

Strengthen Security & Compliance

Meet industry standards and reduce risk.

Scale with Confidence

Support business growth with resilient, cloud-native applications.

Key Features

Cloud-Native Application Design

Build and run highly scalable, resilient applications with minimal downtime.

DevOps & Modern Development

Implement CI/CD pipelines, automation, and best practices for rapid, reliable releases.

Cloud Migration

Move workloads to the right cloud platform (AWS, Azure, Private Cloud) for agility, cost optimisation, and innovation.

Containerisation & Microservices

Adopt Kubernetes and container-based architectures for flexibility and efficiency.

Continuous Improvement

Deliver new features every two weeks, leveraging static security code scanning and automated testing.

Application Modernisation Service

Service Components

Professional & Managed Services

End-to-end support from advisory to delivery and ongoing management.

CI/CD Pipeline Implementation & Review

Design, build, and optimise continuous integration and delivery processes.

Well-Architected Reviews

Health checks for Azure and AWS environments based on industry frameworks.

DevOps as a Service

Access to specialist teams for building and refining DevOps and release pipelines.

Application Support & Platform Management

Ongoing support, innovation projects, and hardware/software lifecycle management.

Unlock Agility, Security, and Speed

Modernise Your Application

For organisations seeking to unlock agility, reduce costs, and future-proof their digital estate.

Accelerate Your Digital Transformation

For teams aiming to adopt cloud-native technologies, DevOps, and automation for rapid innovation.

Strengthen Security & Compliance

For those focused on minimising risk, meeting regulatory standards, and ensuring business continuity.

Why Choose SCC?

Proven Expertise - Extensive experience delivering complex, end-to-end transformation projects.

Comprehensive Approach - Covers the full journey—advisory, migration, modernisation, and ongoing managed services—focused on real business outcomes.

Hybrid & Cloud-Native Solutions - Supports AWS, Azure, Private Cloud, and On-premises, enabling seamless hybrid operations and scalability.

Security & Compliance - Integrates robust cyber security and regulatory compliance into every engagement.

Continuous Improvement - Ongoing optimisation, proactive support, and access to the latest digital technologies and practices.

Trusted Partnerships - Accredited by leading cloud providers, bringing best-in-class expertise and resources.
