Cloud Security Pathfinder

Strengthen Your Hybrid & Multi-Cloud Security Posture

As the rise of multi-cloud platforms accelerates, the attack surface expands dramatically. Exposed storage accounts, misconfigurations, and vulnerable containers leave workloads open to exploitation.

The Cloud Security Pathfinder helps you understand the security risks in your multi-cloud environment. Through exploration and guided analysis using the latest Microsoft security solutions you'll uncover threats, validate vulnerabilities, and receive actionable recommendations that align with your compliance objectives.

Why use our Cloud Security Pathfinder?

- **Discover Real Threats**: through Microsoft's unified XDR experience across hybrid and multi-cloud environments.
- **Security Posture Analysis**: Visibility into vulnerabilities and misconfigurations in your cloud environment.
- **Prioritise Vulnerabilities**: Learn how Security Exposure Management identifies, ranks, and guides remediation of high-risk issues.
- **Explore Defender for Cloud**: protecting workloads across Azure and beyond in your own environment.

Modules

Included

- Microsoft Defender Portal
- Cloud Security Posture Management

Plus 2 Customisable Modules

- Defender for Servers
- Defender for Databases
- Defender for Storage
- Defender for Containers
- Defender for App Service
- Defender for AI Service
- Security Exposure Management

What's in it for me?

Identify real threats and discover vulnerabilities in your cloud environment.

Better understand how to accelerate your security journey using the latest Microsoft Security tools.

Document your security strategy for the benefit of key stakeholders.

Map identified threats to actionable recommendations tailored to your security goals.
