

Data Security Pathfinder

Protect Your Most Valuable Asset

Data leaks from insiders are now common risks that organisations must address alongside external threats, especially as Generative AI becomes more popular in the workplace. Detecting, investigating and acting on data security risks is critical to ensuring trust, creating a safe workplace and protecting company assets, and customer and employee privacy.

Our Data Security Pathfinder gives you the insights you need to understand data security, privacy and compliance risks in your organisation, as well as detailed analysis and recommendations on how to move from your current to target state.

How Does It Work?

Over the 30-day Data Security Pathfinder, SCC require just 4 hours of your time to get set up and report back the results of the data collected. You will then take away an actionable tailored plan to improve your data security strategy.

Why use our Data Security Pathfinder?

- ✓ Uncover hidden risks within Microsoft 365 and on-premises environments.
- ✓ Gain insights into data access, minimise unnecessary exposure.
- ✓ Securely prepare for AI tools such as Gen AI and Microsoft Copilot for 365.
- ✓ Benchmark against compliance standards and regulatory frameworks.
- ✓ Identify and mitigate dark data, reducing compliance gaps.
- ✓ Receive expert-led guidance tailored to your organisation's objectives.

What's in it for me?

Understand your organisation's data risks and identify insider threats.

Evaluate your environment against data protection standards.

Discover tools and services to reduce risks.

Receive and analysis, report, and risks and strategic roadmap.

Microsoft Data Security Pathfinder

Who Is This Suitable For?

Our Data Security Pathfinder is suitable for organisations and teams looking to enhance their security operations through advanced tools and methodologies, these include:

IT Managers, CISOs, and Directors Security Operations Centre (SOC) teams, responsible for data protection, compliance, and risk management leader visibility and control.

Teams undergoing cloud migration, digital transformation, or M&A.

Organisations preparing for Copilot for Microsoft 365 or Gen AI adoption.

Companies needing to benchmark against compliance standards.

Businesses handling sensitive or regulated data.

Organisations with 500+ Entra ID P1 PAUs and active Microsoft 365 usage.

Why SCC?

As a member of MISA and Microsoft Security Solutions Partner, we provide reliable managed security services. We hold all four advanced security specialisations, which reflect our commitment to expertise and service quality.

We utilise Microsoft Sentinel, Defender for Endpoint, and the Microsoft 365 Defender stack in conjunction with our Security Operations Centre to enhance your security posture and ensure prompt detection and response.
