

Azure Migration Pathfinder

Our Azure Migration Pathfinder is a funded engagement to help your organisation transition to Azure efficiently. This assessment determines the suitability of Azure services and aligns your needs with the best migration strategy, considering customer plans, current deployment, usage, processes, and data. By analysing and mapping your IT infrastructure, we create a detailed report to identify the optimal migration strategy for your business.

Whats in it for me?

Fast and actionable results

Exec Ready Insight and Business Case

Technical Roadmap

How does it work?

Our team will conduct a thorough examination of your infrastructure focusing on the commercial, technical and operational suitability for your organisation. We aim to thoroughly understand your requirements to provide a range of options. This process typically takes 8 weeks to complete.

Who is this suitable for?

CIOs and CTOs

Strategic advice and assessments for aligning Azure strategy with business goals.

IT Managers

Insights on optimising infrastructure, enhancing security, and ensuring smooth operations.

Compliance Officers

Gain understanding of Azure compliance with regulatory requirements.

CFOs

Understand benefits and cost-effectiveness of Azure solutions.

Why use our Azure migration pathfinder?

Prepare an exec-ready business case for boardroom buy-in.

Get financial analysis comparing TCO for on-premises costs vs moving to Azure.

Identify challenges that could impact your cloud migration planning.

Clearly identify organisation priorities so you can move on your terms.

Identify process or IT infrastructure improvements for enhanced efficiency.
