DXC Offensive Security Services for UK Public Sector

DXC Service Overview

DXC Strikeforce services offer a comprehensive portfolio of services to ensure that your organization can identify, manage, and mitigate vulnerabilities. We help clients to avoid, identify and remediate vulnerabilities in their applications, infrastructure to improve security resilience and adhere to regulatory compliance. DXC Strikeforce supports on-demand or long-term (package-based) offensive assessments. The on-demand approach is typically for customers who need a one-time penetration test or red team operation for a specific requirement and have limited visibility for the overall demand for an offensive service. In contrast, the package-based approach is offered to customers who have a long-term requirement and planning for an offensive service demand.

DXC Strikeforce employees hold relevant security certifications.

Service Feature

- **Bronze Package:** This package targets medium size organizations who have security concern on their external applications and underlying infrastructure which could be on cloud or on premise. The bronze package offers 90 days of man-day effort in a year and the client can chose any security assessment type from DXC Strikeforce application security or infrastructure security offensive assessments catalog.
- **Silver Package:** This package targets medium size organizations who have the similar concerns defined in bronze package and have interest in red team operations. The silver package offers 140 days of man-day effort in a year and the client can chose any security assessment type from DXC Strikeforce application security or infrastructure security offensive assessments catalog.
- **Gold Package:** This package targets large size organizations who have security concern on their external/internal applications and underlying infrastructure which could be on cloud or on premise. The gold package offers 200 days of man-day effort in a year and the client can chose any security assessment type from DXC Strikeforce application security or infrastructure security offensive assessments catalog.
- **Platinum Package:** This package targets large size organizations who have the similar concerns defined in gold package. The platinum package offers 280 days of man-day effort in a year and the client can chose any security assessment type from DXC Strikeforce application security or infrastructure security offensive assessments catalog.

Service Benefits

- Identify misconfigurations, unused privileges, shadow resources, and deviations from best practices before attackers do.
- Demonstrates the actual blast radius of a breach including lateral movement opportunities, privilege escalation, and data exposure.
- Concrete, prioritized remediation steps to improve defenses where they'll have the biggest effect.
- Identify long-term security strategy improvements
- Provides evidence for compliance and regulatory audits, reducing the burden during external reviews and demonstrates due diligence in cloud security governance.
- Test attack chains and adversary TTPs relevant to your environment. •
- Measure the prevention, detection and logging capability for adversarial techniques.
- Concrete, prioritized remediation steps to improve defenses where they'll have the biggest effect.

- Understand the activities behind triggered alerts to ensure correct actions are taken.
- Validate SOC workflows, IR playbooks, and security tooling for efficiency. Train defenders through hands-on collaboration and knowledge transfer.
