DXC Zero Trust for UK Public Sector

DXC Overview

DXC delivers a comprehensive Zero Trust solution that enhances security without disrupting existing infrastructure.

Increases in remote users and enterprise cloud migrations means organisations must protect large and constantly changing attack surfaces. Traditional perimeter security approaches are now outdated. DXC endorses Zero Trust as the most effective way to secure the new perimeter: people. With users everywhere, protecting network access requires a defensive, multi-layered approach - and DXC's Zero Trust solution is the answer.

DXC services that address Zero Trust model include:

- Digital Identity Services (PAM, IGA, etc.)
- Zero Trust Network Access
- Segmentation
- Cloud Access Security Broker
- Secure Web Gateway
- Cloud Security Services

There are three core principles of Zero Trust and DXC adds a fourth based on our experiences as a leading cybersecurity services provider:

- **Verify Explicitly:** Enforce dynamic authorization at all times, basing access decisions on multiple factors including identity, location, device health, and behavioral anomalies
- **Least-Privileged Access:** Grant only the minimum necessary privileges to resources, limited in both scope and duration. This replaces broad network access with precise, controlled permissions
- **Assume Breach:** Operate under the assumption that a breach has occurred. Adopt a "never trust, always verify" mindset and implement strong network segmentation to limit potential lateral movement

Continuous Monitoring and Assessment: DXC's additional principle helps identify and mitigate risks proactively, enhancing overall cybersecurity resilience

Service Feature

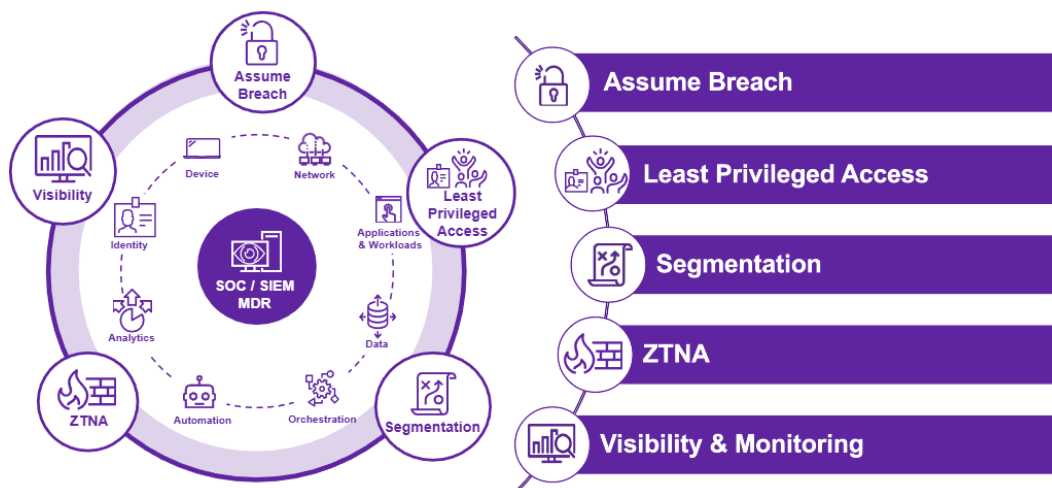

- 24x7 end-to-end continuous monitoring and assessment
- Zero Trust & Least Privilege Access
- Secure remote access to replace legacy VPN solutions

Service Benefits

- Counters evolving cyber threats with agile detection and response
- Limits the potential spread of breaches through microsegmentation
- Improves remote access security over legacy VPNs
- Secures access to diverse corporate apps (on-prem to cloud XaaS)
- Supports compliance with granular access controls
- Helps contain breaches and prevent attackers from reaching critical systems

Differentiation

- Collaborative, scalable Zero Trust adoption approach.
- DXC is a full stack global systems integrator (GSI), with deep understanding of network modernization and cloud migration, provides E2E partnership required for a successful adoption of Zero Trust.
- Senior-level partnerships with multiple vendors; technology-agnostic advice.
- Comprehensive enterprise services portfolio including Strategy and Advisory, Identity Services, Endpoint Management.

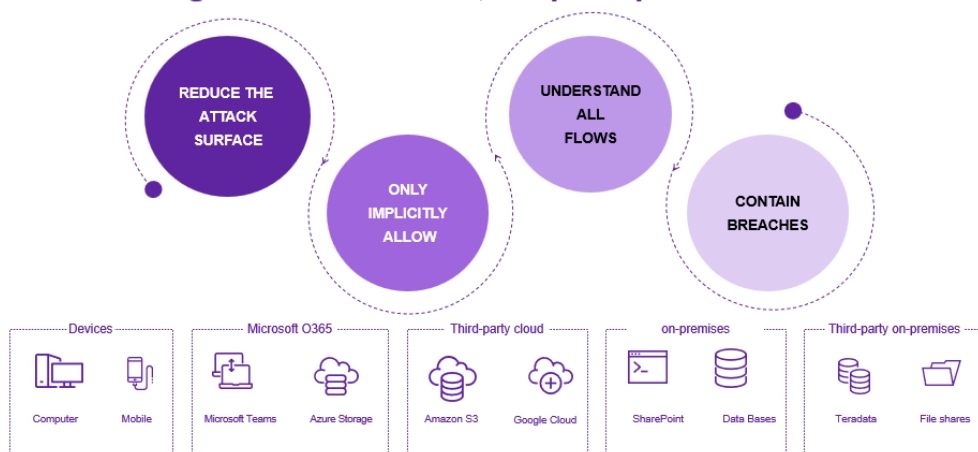

Value Proposition for UK Public Sector

- Easy adoption of Zero Trust principles to counter evolving threats with agile detection and response.
- Application of micro-segmentation allowing organizations to gain uninterrupted defence and granular insight.

- Reshaped remote access provision which allows elimination of implicit trust and enforces continuous verification.
- Strengthen regulatory compliance through continuous verification and granular access controls for audit compliance requirements.

In Micro Segmentation & ZTNA, the principles are the same

Customer Challenges

- Lack of visibility for how users and systems interact.
- Lack of ability to stop lateral movement during an attack.
- Too many systems and networks in-scope for compliance.
- Breaches and ransomware can expand rapidly.

Results

- Expert guidance on Zero Trust micro-segmentation
- Granular blocking of malicious traffic at host-level
- Reduce breach size and response time
- Strengthened resilience against evolving cyber threats.

Case study

ZTNA for ExxonMobil

- Global organization with 90k employees plus contractors required simplified connectivity
- Users connecting from offices and Coffee Shops to Oil Rigs
- Support for legacy mainframe applications and protocols

- No user to connect to any resource without coming through Appgate SDP first

Business Outcomes

- Enabled secure user access to critical applications from anywhere
- Reduced cost
- Reduced attack surface
- Improved remote user experience

About DXC Technology

DXC Technology (NYSE: DXC) is a leading global provider of information technology services. We're a trusted operating partner to many of the world's most innovative organizations, building solutions that move industries and companies forward. Our engineering, consulting and technology experts help clients simplify, optimize and modernize their systems and processes, manage their most critical workloads, integrate AI-powered intelligence into their operations, and put security and trust at the forefront. Learn more on dxc.com.

Every day we deliver excellence for our customers and colleagues. We use the power of technology to deliver mission-critical IT services that move the world. Our customers entrust us to deliver what matters most. We are DXC.

An Employer of Choice

We inspire and take care of our people. We work to create a culture of learning, diversity and inclusion for all our people to grow and reach their full potential.

A Trusted Technology Partner

We understand technology and are committed to delivering excellence for our customers.

A Company that Cares

We are committed to improving the communities in which we live and work. We are good stewards of our company, our customers and the world.

Deliver Mission Critical

We deliver the mission-critical IT services that move the world.

Entrusted to Deliver

Every day, we earn our customers' trust by delivering transformative technologies to ensure the success, safety and well-being of businesses and people worldwide.

Delivery Excellence

Our delivery excellence gives planes flight, helps patients heal, and increases the scale and speed of commerce.

Deliver What Matters Most

We are proud of the work we do and the trust and confidence our customers place in us to deliver what matters most.
