Modernize, Protect, and Accelerate

- Supports any SAP workload on any landing zone from on-prem, over public cloud towards RISE.
- Cater for hybrid and multi landing zones including RISE with a unified Platform Service.
- To manage customer's SAP workloads DXC can bring its own industry leading PaaS for SAP platform or create/use a customer's operational platform.
- Migrate SAP workloads from any to any landing zone (on-prem, private cloud, public cloud, RISE).
- Advise customers in specific SAP Platform capabilities like Ransomware resiliency, ESG, Security, Sovereignty and public cloud services integration to name a few.

How we deliver results

- Achieve up to 40% cost reduction through intelligent automation, optimized cloud services, SAP and cloud infrastructure incentive programs.
- SAP and public cloud certified staff + industry & global recognized SAP specializations.
- Optimize migrations using near-zero-downtime accelerators.
- Provide resilient architectures and capabilities achieving industry leading SAP SLAs.

DXC SAP Platform Services

Success Stories

- ▶ CRODA contracted DXC to migrate 106 SAP workloads in 12 weeks to Azure with no business disruption. There was significant **reduction in database costs by over 70%, enhanced application performance with a 40% faster response time**, and improved operational agility, scalability, and business outcomes.
- ▶ A leading manufacturing company collaborated with DXC to migrate and run its **238 servers, 60+ SIDs, large databases like HANA, ASE, and MSSQL** from traditional data centers to AWS whilst ensuring high availability and disaster recovery.
- ▶ Ocean Network Express worked with DXC to consolidate its global and regional SAP financial systems onto Google Cloud, ensuring **high availability and scalability across 53 countries**. The company achieved enhanced operational efficiency, improved decision-making with real-time data access, and streamlined business processes.
- ▶ A large energy company's SAP workloads were migrated to a hybrid **RISE on a sovereign cloud and Azure Gov Cloud supporting customer compliance, cost and license optimizations**. DXC is also managing those environments with **service consistency**.
