- ✓ Employees completed 4M training hours via DXC Learning
- ✓ Donated \$6M to more than 1,000 global causes
- ✓ Implemented employee feedback surveys to continually strengthen our company's culture

Achieved a top score of 100 in the 2025 Disability Equality Index

Awarded a silver medal by EcoVadis in 2024 for outstanding sustainability performance

Awarded Prime status by ISS ESG to recognise DXC for fulfilling ambitious absolute performance requirements

Governance

Instilling trust and garnering respect among the stakeholders we serve through transparent leadership, to drive sustainable growth

- ✓ Leadership by experienced and engaged directors and the board's key committees
- ✓ 50% of directors are from traditionally underrepresented racial/ethnic minority groups, and 30% of directors are female
- ✓ Robust ethics program with proactive audit and risk assessments
- ✓ Continual investment in information security and data privacy to aggressively maintain best-in-class assurances

DXC discloses its ESG performance in alignment with preferred ESG frameworks, including SASB, TCFD, CDP and GRI, and in adhering to their principles. UN Global Compact Signatory since 2017.

Product description

Boomi

Boomi is a cloud-based integration and iPaaS (integration Platform as a Service) solution. It's designed to help organisations connect, integrate, and coordinate data and processes across different applications, systems, cloud services, on-premise software, and data stores.

Application Integration: Boomi enables organisations to link disparate applications (e.g. ERP, CRM, HR systems, databases, SaaS tools) so data flows smoothly between them.

Data Integration & ETL: It supports transforming, migrating, and synchronising data between systems enabling workflows such as data ingestion, cleansing, data consolidation, and data pipeline automation.

Workflow & Process Automation: Boomi lets businesses set up automated business workflows that span multiple systems. For instance: when a new customer is created in one system (CRM), automatically create corresponding records in billing, support, analytics systems.

API Management & Orchestration: It allows organisations to expose and consume APIs simplifying how internal and external services communicate. Boomi can manage APIs, handle authentication/authorization, and coordinate API-based integrations.

Hybrid & Multi-cloud Integration: Because businesses often use a mix of on-premise and cloud systems, Boomi supports hybrid environments letting integration across traditional databases/servers and modern cloud/SaaS offerings.

Real-time & Batch Processing: Boomi supports both real-time data flows (e.g. real-time updates between systems) and scheduled/batch data transfers depending on business needs.

Scalability & Flexibility: As a SaaS/iPaaS, Boomi can scale with an organisation's needs, avoiding heavy upfront infrastructure or maintenance.

Tangled in Tools

360+

Applications

1,000+

Data Stores

10,000+

APIs

The Burden of Digital Sprawl

CIO

IT Friction

Can't run at the speed of business

CAIO

AI Chaos

Disjointed AI projects unmanaged across enterprise

CFO

Risk Exposure

Noncompliance with financial disclosure and regulations

CDO

Data Breach

Digital sprawl introducing too many security entry points

Fragmented Processes

Islands of innovation across disparate platforms and tools

Loss of Trust in AI

Lack of standardized grounding and context

Cost

Inefficiencies, duplicative business systems

Privacy Compromised

Lack of standardized data policies for PII

Stifled Innovation

Productivity and budget sinkhole

Security Concerns

Data leaks as a result of AI initiatives

Unpredictability

Org misalignment, slow decision-making

Compliance

Lengthy internal processes to verify conformance

Modern iPaaS for Agentic Automation

Implementation methodology

DXC Project Methodology

Utilises a Waterfall approach for high-level planning and governance, with an embedded Agile framework for efficient delivery of business outcomes and value.

Implementation Deliverables

Deliverables:

- **User Stories & Requirement Configuration:** Develop and configure technical and functional requirements for based on approved user stories.
- **High-Level Architectural diagram** of proposed solution.
- **Configuration Completion:** Implement configurations aligned with signed-off user stories.
- **Sprint Demos:** Conduct demonstrations of all in-scope processes at the end of each sprint.
- **End-to-End Testing:** Perform comprehensive functional testing across all in-scope modules. Provision of test scenarios supporting client creation of test scripts for UAT.
- **Core Team Enablement:** Provide knowledge transfer sessions for the core team on solution.
- **Operational ITSM Solutions:** Deliver fully operational agreed solution modules.
- **Training & Documentation:** Conduct “Train the Trainer” sessions. Provide (where applicable) Quick Reference Guides.
- **Technical knowledge transfer**
- **Solution design documentation:** for ongoing reference.

Implementation services

DXC Implementation Services

- Implementation services leverage some of the following roles via a Project or Staff Augmentation approach.
- Projects can be T&M or Fixed Price
- Project costs are dependent on scope (please contact DXC for project proposals).
- Hybrid delivery roles (onshore/nearshore/offshore) or pure onshore options available
- Rate discounts are dependent on project size.
- Please refer to the Pricing document showing our Rate Card for 2025/26. The roles and rates shown can be subject to change so please contact DXC for the latest information.

DXC Implementation Services

The DXC Technology rate structure provides customers to select either UK Based (Local Delivery) or Off-Shore Consultants within each category depending on the delivery model chosen.

The engagement can be either fixed price or on a time and materials basis. DXC pricing is based on per-day rate cards aligned to the SFIA framework definitions and separate rates exist for onshore and offshore rates.

- **UK-Based On-site** (Customer premises) and / or DXC UK Locations
- **Regional Delivery** Leveraged Global / Regional Delivery from a DXC site
- **(India and Bulgaria)** dependent on consulting expertise / location and security requirements.

Note: Other offshore locations are available; pricing is available depending on the service required. The benefit to your business is that DXC can provide an efficient and economical delivery model allowing clients to add technical resources quickly to meet growing needs. We would be delighted to engage with you and determine the best fit for your projects in order to achieve the outcomes you need. Once agreed, this would form the basis of the order, and be subject to the Call-Off and DXC Terms, and Conditions, which support this service.

- **Consultant's Working Day** – 7.5 hours exclusive of travel and lunch.
- **Working Week** - Monday to Friday excluding national holidays
- **Office Hours** - 09:00 – 17:00 Monday to Friday
- **Travel and Subsistence** - Included in day rate within M25. Payable at department's standard T&S rates outside M25.
- **Mileage** - As above
- **Professional Indemnity Insurance** - Included in day rate.
- **Value Added Tax (VAT)** - Excluded and chargeable at the prevailing rate
