DXC Cyber Vault Services

DXC Overview

DXC's Cyber Vault Services combine industry-leading technology, cyber expertise, and rich threat intelligence to safeguard critical data and foundational technologies from cyber attacks/ ransomware.

DXC Cyber Vault Services protect businesses from attacks and ransomware using a multi-layered approach which includes:

- Cyber Recovery software, data protection storage, hosted data centers, and usage reporting and management
- Fully managed services provided by DXC data protection teams trained and certified.
- Biometrically controlled access to the physical infrastructure

Service Feature

- 24x7 automated air gap solution with immutability.
- Remotely managed in a customer data centre, hosted in a DXC data centre or deployed in the cloud.

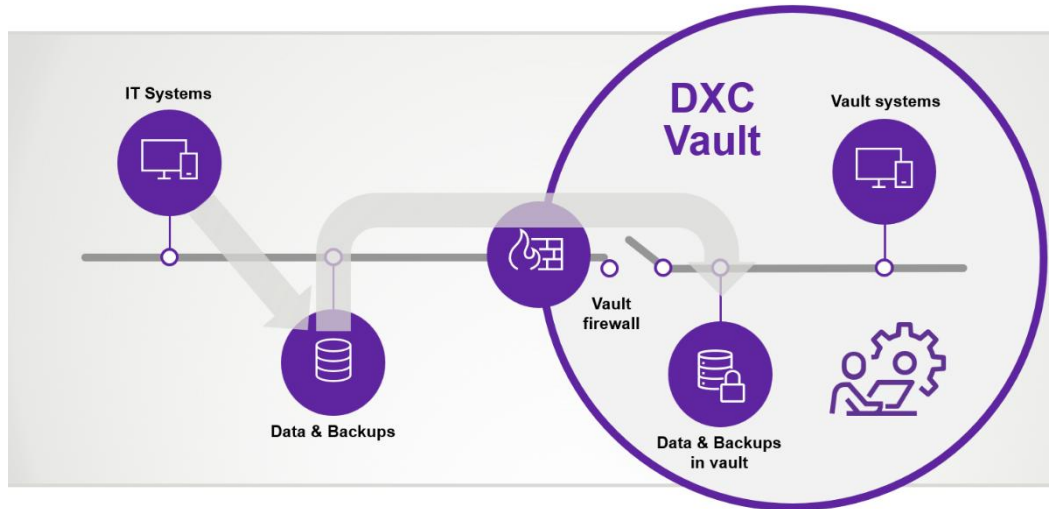

Service Benefits

- An isolated, air-gapped vault to protect critical data from cybersecurity threats.
- Immutable backups that cannot be altered, ensuring clean recovery.
- Fast enterprise-wide restoration, minimizing downtime and financial loss.
- Compliance-ready security for industries with strict regulations.

Differentiation

- DXC Cyber Vault Services protects businesses from cybersecurity threats across all environments.
- DXC secure-by-design approach and enables confident operations in an increasingly complex and risky world.
- DXC's 3,500 cybersecurity professionals, 200 cyber defence specialists, eight security operations centres and 400+ clients across the globe, make DXC Technology uniquely positioned to help defend and protect the enterprise.

How it works

Value Proposition for UK Public Sector

- Immutable backups that cannot be altered, ensuring clean recovery.
- Fully managed services provided by data protection teams from biometrically controlled infrastructure.
- With DXC Cyber Vault Services, you can trust that your business is shielded from cybersecurity threats, ensuring your operations remain secure and resilient.

Disaster Recovery is not Cyber Recovery

Traditional “DR” is not enough to address modern cyber threats

Category	Disaster Recovery	Cyber Recovery
Recovery Time	• Close to instant	✓ Reliable and fast
Recovery Point	• Ideally continuous	✓ One day average
Nature of Disaster	• Flood, power outage, weather	✓ Cyber attack, targeted
Impact of Disaster	• Regional; typically contained	✓ Global; spreads quickly
Topology	• Connected, multiple targets	✓ Isolated, in addition to DR
Data Volume	• Comprehensive, all data	✓ Selective, includes foundational services
Recovery	• Standard DR (e.g., failback)	✓ Iterative, selective recovery; part of CR

Case study

Security and Data Centre Modernisation

DXC delivers Platform and Operational Services to one of Australia's largest and most critical agencies.

Alongside application support and analytics services, DXC delivers storage and security services to achieve enhanced security, scalability, agility and ease of backup. As part of a larger solution - DXC delivers the following:

- Mission critical on-premise server hardware, virtualisation, and Storage
- Secure network and gateway services
- Large volume transaction processing via Mainframe services
- Front line application support
- Security services covering North / South and East / West traffic
- Entire organisation Remote User capability
- Geographically dispersed, secure and Redundant Data Centre Services
- Project and engineering services
- Big data solutions supporting data analytics services

As a result of working with DXC, the agency have experienced the following results:

- Security operations provision based on best practice and reduced risk.
- Provision of high quality and robust end customer services.
- Cost-effective IT services.
- Greater agility, flexibility and compute power to meet growing business demands.
- Security, scalability, agility, ease of backup and application compatibility.

Customer Challenges

- Protection of critical data from Ransomware attacks.
- Availability and integrity of data during an attack.
- Air gapped and immutable storage of critical data..
- Increased efficacy of cyber resilience measures.

Results

- DXC's and cyber vault services keep our customers systems and data protected and recoverable with minimum disruption.
- Compliance ready security for industries with strict recovery regulations.

About DXC Technology

DXC Technology (NYSE: DXC) is a leading global provider of information technology services. We're a trusted operating partner to many of the world's most innovative organizations, building solutions that move industries and companies forward. Our engineering, consulting and technology experts help clients simplify, optimize and modernize their systems and processes, manage their most critical workloads, integrate AI-powered intelligence into their operations, and put security and trust at the forefront.
