SaaS Licensing for Epimorphics Hosted Cloud Software (dedicated to client)

Base Service

Cloud Software Product	Tier / Component	Pricing			
		Monthly Total	Annual Equivalent Total	Discounts	Notes
Data Platform Base Service	Base service (environment, running costs, excluding hosting costs)	£3,500.00	£42,000.00	10% discount if only containing once core service component. If only taking the entry-level hosting arrangement a further 25% discount applies.	Expectation that one of these would be required. Other Epimorphics core services could be combined with one base service.
	Optional additional support credits (5 days) in advance	N/A	£5,500.00	discount included in price	Pre-paid call-off of 5 days support for additional support related activities
	Optional additional support credits (10 days) in advance	N/A	£10,000.00	discount included in price	Pre-paid call-off of 10 days support for additional support related activities
	Other support	see our Cloud Support offerings or our Rate Card			

Core Services

Cloud Software Product	Tier / Component	Pricing		
		Monthly Total	Annual Equivalent Total	Notes
Linked Data Publishing Platform Service	Linked Data Publishing Service and non-resilient store	£1,500.00	£18,000.00	Our most popular core service providing a fully standards-compliant linked data publication service, for publishing high volumes of linked data and associated applications at scale
	Linked Data Publishing Service and replicated triple store (Podium)	£1,800.00	£21,600.00	This version includes a replicated data store for additional resilience and scale, for higher levels of use
	Additional test / sandbox environment	£1,000.00	£12,000.00	
Data Integration and Publishing Platform Service	Data Integration and Publishing Service and non-resilient store	£2,000.00	£24,000.00	A variant of our data publishing with a focus on data integration fully standards-compliant linked data (and other formats) publication service for internal and external use, for publishing high volumes of data and associated applications at scale to support other systems, data science, AI and other business priorities
	Data Integration and Publishing Service and replicated triple store (Podium)	£2,500.00	£30,000.00	This version includes a replicated data store for additional resilience and scale, for higher levels of use
	Additional test / sandbox environment	£1,000.00	£12,000.00	
Reference Data Management Service (Registry)	Reference Data Management Service (Registry) and non-resilient store	£1,000.00	£12,000.00	The Reference Data Management Service is a solution that builds upon the open source registry software that we developed. The service and software is trusted and used internationally by organisations needing to manage their reference data. It provides a range of reference management tools and services such as controlled, authoritative lists

				of identifiers as URIs. This supports good data governance, data standards, data collaboration and data use.
	Reference Data Management Service (Registry) and replicated triple store (Podium)	£1,500.00	£18,000.00	This version includes a replicated data store for additional resilience and scale, for higher levels of use
	Additional test / sandbox environment	£950.00	£11,400.00	
Agora Concept Store	Agora Concept Store and non-resilient store	£1,500.00	£18,000.00	A data standards and data governance tool providing - a concept Store and associated controlled vocabulary (CV) browser for managing, curating and sharing vocabularies and vocabulary standards.
	Agora Concept Store and replicated triple store (Podium)	£2,500.00	£30,000.00	This version includes a replicated data store for additional resilience and scale, for higher levels of use
	Additional test / sandbox environment	£1,000.00	£12,000.00	
Agora Data Catalog	Agora Data Catalog and non-resilient store	£1,500.00	£18,000.00	A simple to use data catalog that helps people find, understand and access your data. It allows your teams to catalog the datasets and services they create and manage. It provides ways to join datasets together, to share them, and to create communities around data. The simplest implementation has reduced resilience and data replication
	Agora Data Catalog and replicated triple store (Podium)	£2,500.00	£30,000.00	This version includes a replicated data store for additional resilience and scale, for higher levels of use
	Additional test / sandbox environment	£1,000.00	£12,000.00	
Agora Measurement Store	Agora Measurement Store and replicated triple store (Podium)	£3,500.00	£42,000.00	Manage very high volumes of data from environmental, or other, sensor networks while providing the high quality metadata needed to make the data findable, accessible, interoperable, and reusable

	Observation Store extension	£2,500.00	£42,000.00	Optional extension to expand the measurement store capabilities to a more flexible set of observational data
	Additional test / sandbox environment	£2,000.00	£24,000.00	

See notes below for applicable **discounts**

Optional Extras

Optional Extras	Tier / Component	Pricing			Notes
		Set Up / One Off Total	Monthly Total	Annual Equivalent Total	
Enhanced Onboarding Support		Effort based - see SFIA rate card	N/A	N/A	Onboarding may include brand alignment, data loading, configuration and other set up tasks
Advanced Server Log Analysis and regular reporting		Effort based - see SFIA rate card	£500.00	£6,000.00	Set-up activities to build additional automated reports and set up report templates as agreed, plus to define any summary statistics required
Single Sign-on Integration / OAuth Access Controls		Effort based - see SFIA rate card	£500.00	£6,000.00	Setup is rate card based support, due to the variety of setup arrangements and requirements within different organisations
Data Explorer app	Basic	£30,000.00	£1,150.00	£13,800.00	We offer tailored data explorer applications on top of the platform, in particular for the Linked Data and Data Integration and Publishing Platform Services
	Advanced	Effort based - see SFIA rate card	£1,500.00	£18,000.00	
Geospatial indexing		£30,000.00	£2,000.00	£24,000.00	we offer an additional Geospatial indexing option
Batch APIs		£30,000.00	£1,500.00	£18,000.00	in some situations, a Batch API provides specialist access to the data
URI reverse proxy service		£9,000.00	£250.00	£3,000.00	the URI reverse proxy service
SPARQL endpoint		£11,500.00	£1,000.00	£12,000.00	some specialist services supporting specialist users require an accessible SPARQL endpoint
GraphQL endpoint		£11,500.00	£850.00	£10,200.00	we offer a GraphQL endpoint option for exposing the data

SAPI-NT data API endpoint	Simple	£5,600.00	£600.00	£7,200.00	we often provide our SAPI-NT API endpoint to support application development, exposing this more widely is an additional option
	Typical	£11,500.00	£600.00	£7,200.00	
Data Conversions and Data Update Automation		N/A	N/A	£10,000.00	Data conversion, data update automation, integration with existing workflows: these may require the use of components of our proprietary Data Management System for which we charge an annual licence fee
Other Consultancy		Effort based - see SFIA rate card			

Hosting

Level	Pricing Details	
	Monthly	Notes
Entry-Level System	£855.00	This provides for the storage of up to 10 million triples and bandwidth of 10Gb/month. If these limits need to be exceeded, then you will need to upgrade to the full platform. Note the additional discount on the base platform above.
Complete Fixed System	£1,150.00	This provides for the storage of up to 60 million triples and bandwidth of 20Gb/month. We charge an extra £855.00/month for each additional 50 million triples, and an extra £230.00/month for each extra 10Gb/month.
Flexible System	AWS Monthly In-arrears as an expense	The flexible system is intended to cater for a wide variety of customers with very different requirements. The pricing structure for this variant is therefore designed in a very modular fashion, to avoid penalising customers who want a specific combination of options by forcing them to pay for ones they don't want. In particular, therefore, we treat the underlying hosting charges as expenses. We pay these hosting costs on the customer's behalf, and pass them on to the customer with no mark-up. This means that customers who don't need high performance servers underlying their system do not need to pay for them. It also supports customers who need short term scale-up of their infrastructure to cope with particular events.

Alternative Software Licensing (non SaaS model) for self hosting

Product	Tier	Pricing		
		Annual Licence	Discounts	Notes
Agora Concept Store	Agora Concept Store Licence plus replicated triple store Podium licence	£35,000.00	Additional Concept Stores: - 2 to 3 units 15% discount	If you are regularly expecting to need more than 3 units we recommend you consider an enterprise licence.
	Agora Concept Store Enterprise Licence	£90,000.00		Allows flexibility for as many Concept Stores as you require
Agora Data Catalog	Agora Data Catalog Licence plus replicated triple store Podium licence	£45,000.00	Additional Concept Stores: - 2 to 3 units 15% discount	If you are regularly expecting to need more than 3 units we recommend you consider an enterprise licence.
	Agora Data Catalog Enterprise Licence	£125,000.00		Allows flexibility for as many Concept Stores as you require
Agora Measurement Store	Agora Measurement Store plus replicated triple store Podium licence	£100,000.00	Additional Concept Stores: - 2 to 3 units 15% discount	If you are regularly expecting to need more than 3 units we recommend you consider an enterprise licence.
	Agora Measurement Store Enterprise Licence	£250,000.00		Allows flexibility for as many Concept Stores as you require
	Observation Store extension Licence	£50,000.00	Additional Concept Stores: - 2 to 3 units 15% discount	Additional extension to expand the measurement store capabilities to a boarder set of variable observations.
SAPI-NT API Library	SAPI-NT API Library single service licence	£35,000.00	Additional Concept Stores: - 2 to 3 units 15% discount	If you are regularly expecting to need more than 3 units we recommend you consider an enterprise licence.
	SAPI-NT API Library Enterprise Licence	£90,000.00		Allows flexibility for as many Concept Stores as you require

Other Services

For our **Training** and other **Cloud Support Services** see our GCloud14 Cloud Support Service Offerings, or see our **Rate Card**.

Notes

- There are no termination charges associated with the service. All client data will be securely deleted at the end of the contract term.
- The above prices assume a minimum contract term of 12 months. For contracts less than 12 months in duration a 5% surcharge applies.
- All prices exclude VAT and expenses
- Additional core services of the same type are discounted: - 2 or more units 15% discount on the additional units
