

Shaping Cloud

Delivering Digital Difference in the
Regulated Sectors

Where Shaping Cloud can help public sector clients

Accelerate delivery of priority services

- Cut through complexity to unblock stalled programmes, modernisation initiatives, and transformation backlogs.
- Provide experienced delivery leadership and practical cloud expertise to move from strategy to execution.

Deliver measurable outcomes quickly

- Identify and realise rapid cost savings through cloud optimisation, right-sizing, and removal of waste.
- Deliver quick wins that release budget and capacity for frontline services and priority projects.

Unlock smarter, faster decisions with data & AI

- Turn fragmented data into trusted insights that support operational, financial, and policy decisions.
- Apply AI safely and pragmatically to improve forecasting, planning, and service performance.

Reduce risk and strengthen resilience

- Improve security, compliance, and operational stability across cloud and legacy environments.
- Design platforms and operating models that are resilient, supportable, and aligned to public sector assurance requirements.

We're ready to help you deliver smarter, faster, and with greater value

Who we are

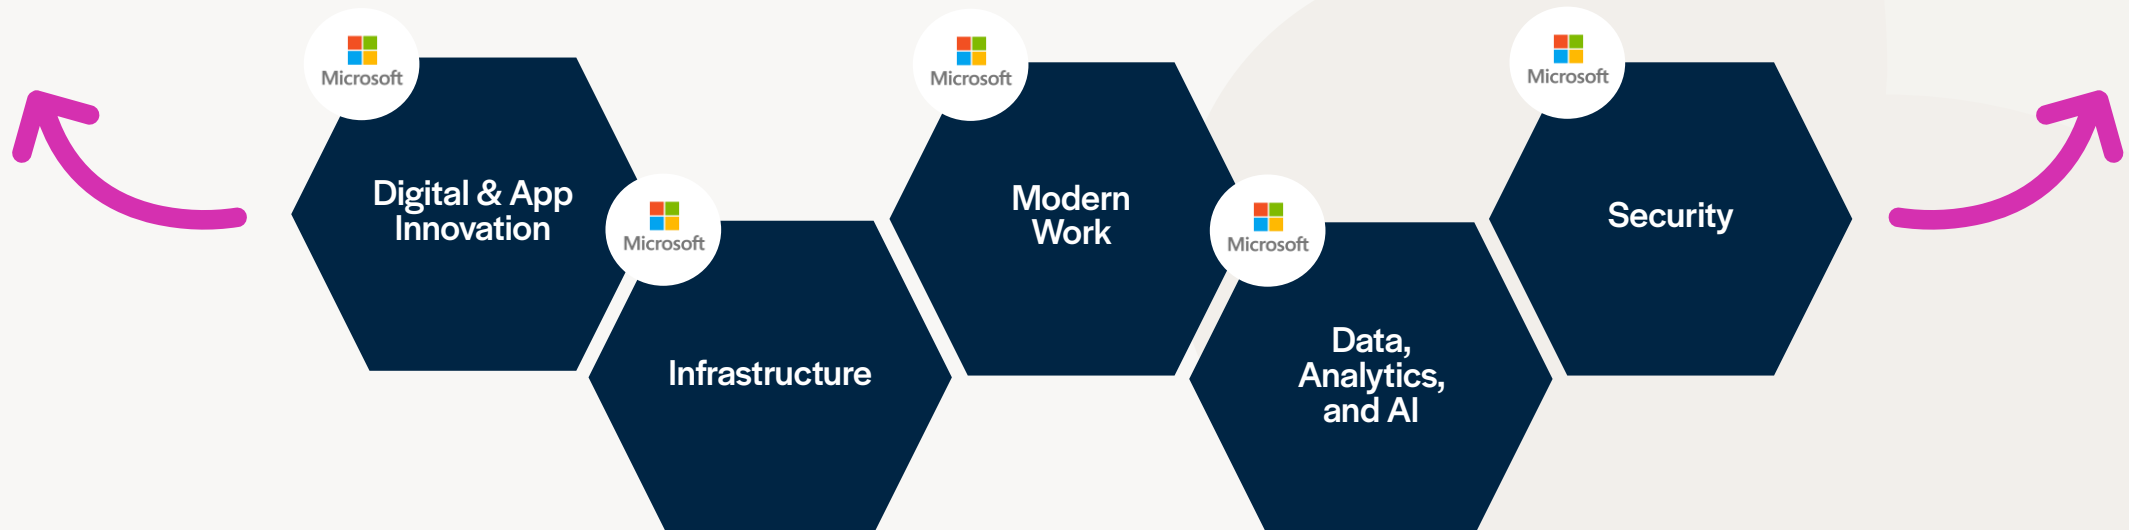

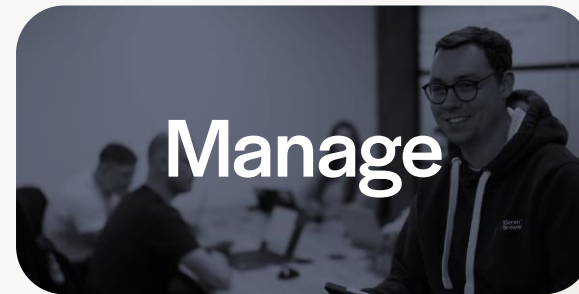

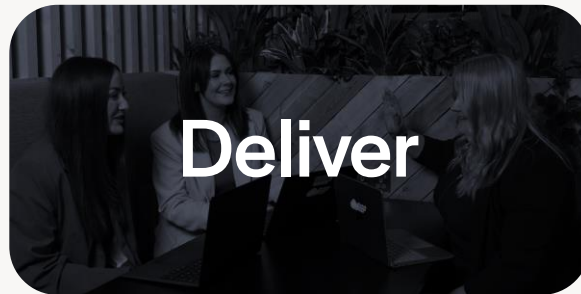

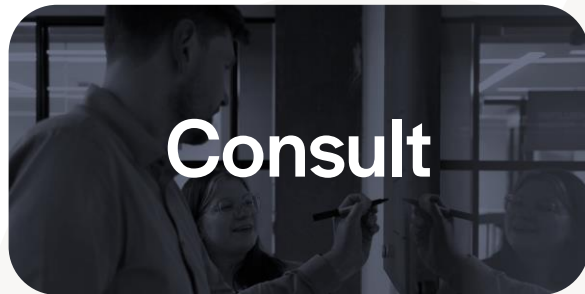

We enable mission-critical digital transformation on Azure - accelerating outcomes, reducing complexity, and unlocking long-term value for organisations in government, health, housing, legal and finance.

What we do

Shaping Cloud is at the forefront of cloud solutions, expertly leveraging technology to transform business operations. Experts in strategic planning, migration, transformation, and build, we ensure customers realise tangible business value through cloud services - *empowering innovation, optimising value*. Recognised for our strategic depth and operational excellence, we're the partner of choice for businesses seeking to innovate and maximise value with cloud technologies from infrastructure to data and AI.

A deep, aligned Microsoft partnership

We're focused on specialising in Microsoft tech, with partnerships to complement and enhance client outcomes.

Why us?

Shaping Cloud is built for environments like the public sector - complex, high-stakes, and under pressure to deliver more with less. We specialise in helping organisations modernise legacy systems, unlock value from existing investments, and accelerate outcomes - all while navigating scrutiny, risk, and tight budgets.

Experienced

With over a decade of hands-on delivery in complex environments, our team brings real-world expertise across cloud, infrastructure, and digital transformation. We're practitioners, not theorists - and that shows in the quality of our results.

Outcomes Focussed

We align every engagement to measurable outcomes - maximising the value of our clients' technology investments and holding ourselves accountable for long-term impact. As such, we prefer to work on an outcome-basis: boosting our accountability.

Zero Bureaucracy

We're easy to work with: we're agile, responsive, and trusted to deliver. We cut through red tape so our teams can move fast with our clients, not just for them.

Over a decade of delivery in cloud and digital transformation

Specialists in complex, high-risk and regulated environments

Deep Microsoft expertise (Azure, infrastructure, Data & AI)

Trusted by organisations where complexity and scrutiny are high – from central government and healthcare, to manufacturing, legal and finance.

Why does this matter to the public sector, now?

The UK public sector delivers some of the most complex services in the world. But rising demand, constrained funding, ageing technology, and increasing scrutiny mean organisations must modernise while continuing to deliver. The challenge is no longer whether to change – it's how to do so safely, affordably, and at pace.

Why it matters now...

- Demand continues to rise, while budgets remain flat or reduce in real terms.
- Legacy technology is consuming a growing share of spend, limiting investment in frontline services.
- Leaders are under increased pressure to demonstrate value for money, resilience, and measurable outcomes.
- Data volumes are growing, but insight is often slow, fragmented, or unreliable.

Where we fit...

- We modernise legacy platforms and operating models without putting live services at risk.
- We deliver real, evidenced cost savings through cloud optimisation and removal of waste.
- We accelerate delivery using pragmatic, low-friction approaches that work within public sector constraints.
- We build practical data and AI foundations to support better decisions – not experiments for their own sake.

We've done this for...

- NHS organisations modernising legacy estates while maintaining clinical service continuity.
- Central & local government departments re-platforming critical services to Azure under tight assurance controls.
- Arm's-length bodies and regulators needing secure, compliant data platforms.
- Highly regulated organisations exiting or consolidating data centres under time and cost pressure.

Cost Control

Identify and reduce legacy tech costs

Data Maturity

Enable better decisions with unified, modern platforms

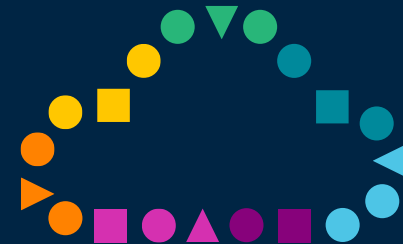

Infrastructure Transformation

Improve agility, resilience and sustainability

Cloud Modernisation

Accelerate safe migration and remove blockers

Track Record

Chosen by organisations that need results

Who we work with...

We work with customers across regulated and high-risk industries

Government	Healthcare	Professional Services	Finance & Insurance	Other
 GMCA GREATER MANCHESTER COMBINED AUTHORITY	 Greater Manchester	 ADDLESHAW GODDARD	 MSIG	 BERICAP
 Ofsted	 Mid and South Essex University Hospitals Group	 irwinmitchell	 Newcastle Building Society	 Red Bull
 The Insolvency Service	 <i>Blood and Transplant</i>	 dwf		 PRS for MUSIC
 DERBYSHIRE County Council	 Calderdale and Huddersfield NHS Foundation Trust	 Pertemps		 REGATTA GREAT OUTDOORS

How we engage to help you

To ensure alignment and momentum, we typically work with;

- CIO / CTO / Head of Digital - to align with strategic goals
- Infrastructure & Cloud Leads - to unblock technical delivery
- Programme & Transformation Managers - to accelerate outcomes
- Finance & Commercial Teams - to ensure cost-effectiveness

We're happy to tailor our approach based on your structure and priorities and welcome an opportunity to engage further.

Next Steps

- ◆ **Explore Opportunities**

Book a short discovery session to align your current digital priorities with tangible outcomes.

- ◆ **Assess Quick Wins**

Let us undertake a no-cost technology estate review to identify savings within weeks.

- ◆ **Deliver Early Value**

Kick off with a focused, fixed-price engagement to remove blockers and accelerate delivery.
