

EMIS Web Clinical Services Pricing

EMIS Web Clinical Services is a configurable Electronic Patient Record solution designed to support multidisciplinary teams. It enables organisations to work collaboratively, helping relieve operational pressures, increase appointment capacity, and improve service efficiency. Core integrations—such as Consultation Write Back, Care Record Sharing, GP Connect, and Cross‑Organisational Appointments which allow clinicians to access and contribute to a shared patient record. With the right sharing agreements in place, clinicians can view the information they need to deliver accurate, personalised care within a dedicated hub environment. This streamlines service delivery, enhances continuity, and supports flexible operations, even in mixed‑economy settings.
