Summary

Integrated care provides patients with a more comprehensive and coordinated approach to health care, which leads to better health outcomes, improved patient satisfaction, and cost efficiencies. Interoperable technology is vital to achieve this. When clinicians have all the information they need to hand, at the point of care, faster, more informed decisions can be made.

Pricing table

Exclusive of VAT

Product	Unit	Price
Shared Record Viewer	Per instance for up to 50 Users	£4,970.00
Shared Record Viewer	Per instance for 51 - 100 Users	£9,325.00
