

EMIS Web[®] *for Community*

Deliver safer, smarter and better-connected care with our integrated community system.

Empowering you to deliver care closer to home

Community services are central to the NHS's vision of moving care closer to home. To achieve this, teams need flexible, integrated tools that connect professionals across services, reduce pressure on hospitals, and improve experiences for patients and clinicians.

As a community team delivering coordinated care, EMIS Web[®] equips you with the tools for integrated, data-driven clinical decisions and improved patient outcomes.

With seamless record sharing, multidisciplinary teams can work together as one, ensuring vital patient information is always available to those who need it.

Designed around the needs of community services, our software enhances efficiency and maximises patient safety. With built-in templates and protocols, EMIS Web helps to reduce duplication, streamline admin, and support safer handovers: freeing up more time for patient care.

Sophisticated clinical decision support at the point of care offers prescribing guidance and automated alerts enabling you to provide the best possible care to patients. Our comprehensive search and reporting functionality enables you to harness the power of your data to review performance, manage audits and evaluate population health.

Key benefits

Save time to focus more on patient care.

Share data easily for joined-up neighbourhood care.

Make informed decisions with real-time patient information.

Plan services using real-world data for timely support.
