Enlivio Health

Product Summary

Neighbourhood teams face growing pressure to deliver coordinated, proactive care. Our MDT care coordination solution unites caseload management, patient insights and real-time collaboration in one digital workspace, empowering teams to act quickly and improve outcomes for patients and populations.

Modernising neighbourhood care through integrated MDT coordination

Our digital MDT care coordination solution creates a single online workspace for neighbourhood teams, consolidating essential patient information in real time. Built on EMIS-X, it ensures every team member — whether in the community or office — has instant access to the latest details.

Currently, multidisciplinary teams often work with fragmented systems and delayed updates, which hinder timely decision-making. This solution removes those barriers by streamlining access, reducing manual checks, and providing a shared live view for all.

As part of our broader strategy to strengthen neighbourhood working, this tool supports smarter collaboration, faster decisions and more integrated care — helping teams work more efficiently and improving outcomes for the people and communities they serve.

Enlivio Health

Egton Medical Information Systems Ltd (t/a Enlivio Health), a company registered in England and Wales (registered number 02117205) with a registered office at Fulford Grange, Micklefield Lane, Rawdon, Leeds, LS19 6BA.
