# 1. Service Description

---

Cyber security is unfortunately a growing area of concern for many organisations. High profile breaches are becoming more and more common and the move to both home working and the cloud is creating new attack vectors that cyber criminals can use. As cyber security threats evolve so does the way you should defend your organisation.

That's where Bridgeall can help. We've partnered with SentinelOne to offer their Endpoint Detection and Response (EDR) product, the next generation when it comes to antivirus protection.

This Bridgeall managed security product goes further than traditional antivirus products and will help you prevent, detect and respond to ever-changing threats – and recover quickly should a security threat strike.

1. Provides real-time endpoint protection
2. Advanced threat hunting features
3. Reverses and removes malicious activities with Active Endpoint Detection Response

As a SentinelOne partner, we bring a wide range of experience helping organisations choose the right solution to make their business more secure. Let us help you build an effective strategy and help you drive your business forward.

We provide a full range of advisory, implementation, support and licensing services to help you get the right solution for your business.

## 1.1. About SentinelOne

SentinelOne is a cloud-based security endpoint solution that provides a secure environment for businesses to operate. The platform safeguards the world's creativity, communications, and commerce on devices and in the cloud.

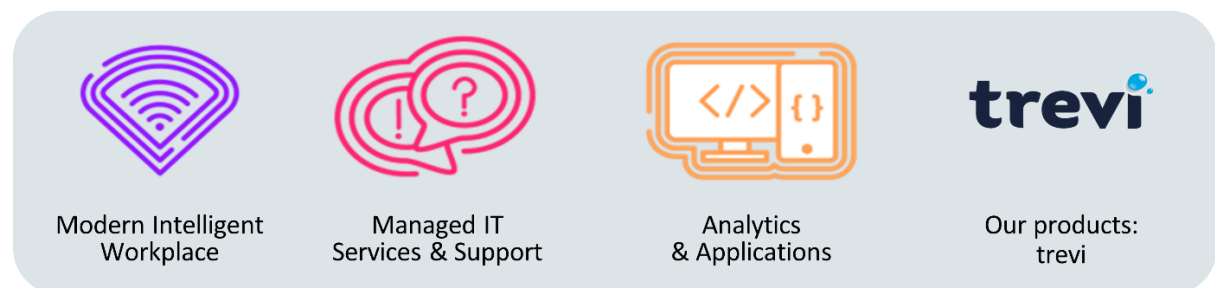

It streamlines business processes by allowing you to manage digital assets in real-time and adds an enhanced security layer. From data security, IoT security, end protection, endpoint detection, and response (EDR), SentinelOne has all the features you need to discover vulnerabilities and protect IT operations.

Its features include attack anticipation and detection, threat hunting, auto immunisation and restoration, early threat detection as well as many more.

## 2. About Bridgeall

Since 2002, Bridgeall has successfully delivered hundreds of projects to private and public sector organisations. Our focus is on providing an exceptional service to our customers by delivering class-leading digital solutions. We are ISO 9001, ISO 27001 and Cyber Essentials Plus certified, demonstrating our focus on quality and governance in everything we do.

As well as having our own software solutions for the water market (Trevi), we split our services up into our 3 main business units; Managed IT Services & Support, Modern Intelligent Workplace and Applications & Analytics.

We are a one-stop-shop for all things Microsoft with certified consultants across the full stack and cloud solutions including Azure, Dynamics 365, Data & Analytics, Microsoft 365, SharePoint, Power Apps and Power Platform, working with the likes of:

### Microsoft

Bridgeall takes great pride in our achievements in recent years of being a 10 x Microsoft Gold Partner. With Microsoft's new Cloud Partner Program, this changed the accreditation approach to focus on key solution areas. As a result, we have achieved the designations required to qualify as an accredited Microsoft Solutions Partner in the following key areas.

Modern Work

Azure Data & AI

Azure Infrastructure

Azure Digital & App  
Innovation

In addition, we are a Tier 1 Cloud Solution Provider (CSP), meaning we have unique access to Microsoft licensing and can offer specialist licensing advice and pricing.

Being a CSP partner, Bridgeall can also offer our clients flexible pricing and billing options, as well as the ability to bundle multiple services together under a single contract.
