1. Service Description

Cyber security threats are on the rise. Security breaches, data leaks and email attacks are a huge threat to all organisations. Now, more than ever, you need a different approach to email security and management. We have partnered with Mimecast, a leader in email security that can help you tackle these issues.

With Mimecast you can reduce the risk, complexity and cost that traditionally comes with protecting email.

1. Safeguard your emails from cyber attacks
2. Secure your data
3. Protect your brand

1.1. About Mimecast

Mimecast offer cyber resilience for email. They aim to empower clients with a holistic approach to cybersecurity, designed to secure, preserve and continue the flow of information via email. Their broad-based multi-dimensional cyber resilience strategy covers everything clients need to stay ahead of today's evolving threat landscape—all from a single cloud platform.

1.2. Mimecast services

As a Mimecast partner, we bring a wide range of experience helping organisations choose the right solution to make their business more secure. With email attacks becoming more advanced, let us help you build an effective strategy and protect your business with Mimecast.

We provide a full range of advisory, implementation, support and licensing services to help you get the right solution for your business.

2. About Bridgeall

Since 2002, Bridgeall has successfully delivered hundreds of projects to private and public sector organisations. Our focus is on providing an exceptional service to our customers by delivering class-leading digital solutions. We are ISO 9001, ISO 27001 and Cyber Essentials Plus certified, demonstrating our focus on quality and governance in everything we do.

As well as having our own software solutions for the water market (Trevi), we split our services up into our 3 main business units; Managed IT Services & Support, Modern Intelligent Workplace and Applications & Analytics.

We are a one-stop-shop for all things Microsoft with certified consultants across the full stack and cloud solutions including Azure, Dynamics 365, Data & Analytics, Microsoft 365, SharePoint, Power Apps and Power Platform, working with the likes of:

Microsoft

Bridgeall takes great pride in our achievements in recent years of being a 10 x Microsoft Gold Partner. With Microsoft's new Cloud Partner Program, this changed the accreditation approach to focus on key solution areas. As a result, we have achieved the designations required to qualify as an accredited Microsoft Solutions Partner in the following key areas.

Modern Work

Azure Infrastructure

Azure Data & AI

Azure Digital & App
Innovation

In addition, we are a Tier 1 Cloud Solution Provider (CSP), meaning we have unique access to Microsoft licensing and can offer specialist licensing advice and pricing.

Being a CSP partner, Bridgeall can also offer our clients flexible pricing and billing options, as well as the ability to bundle multiple services together under a single contract.
