2. Cisilion Business Overview

Cisilion is a UK-based technology consultancy and managed services provider, founded in 2000. Initially built on Cisco and Microsoft solutions, Cisilion now delivers IT services across 70 countries and five continents, holding Cisco Gold Integrator and Provider status for over 18 years.

Microsoft Business Overview

As a longtime Microsoft Solutions Partner, Cisilion specialises in designing, deploying, and supporting secure, modern digital workplaces. We help organisations maximise their Microsoft investments, enhance productivity, strengthen security, and modernise operations through deep technical expertise, ITIL-aligned managed services, and robust delivery capability.

Microsoft Proposition

We offer an end-to-end Microsoft portfolio covering:

- Modern Work: Collaboration, communication, and governance via Microsoft 365, Teams, SharePoint, OneDrive, Intune, Autopilot, and Viva.
- Intelligent Cloud & Infrastructure: Azure cloud design, migration, optimisation, networking, backup, and business continuity.
- Enterprise-Grade Security: Integrated Microsoft security, Sentinel SIEM, Entra ID, compliance, and governance solutions.

Cisco Business Overview

- Cisilion is a long-standing Cisco Gold Partner delivering secure, scalable, and high-performing network, collaboration, and datacentre solutions. Our Cisco proposition spans campus networking, SD-WAN, Meraki cloud management, security, contact centre, and collaboration platforms including Webex and Cisco Unified Communications. We combine deep engineering expertise with proven consulting, project delivery, and ITIL-aligned managed services to help organisations modernise infrastructure, enhance security, and improve user experience. Cisilion's UK-based NOC and SOC provide proactive monitoring, incident management, and lifecycle governance across Cisco technologies, ensuring reliability, resilience, and continual optimisation for public and private sector customers

Cisco Proposition

Cisilion is a Cisco Gold Partner delivering secure, resilient, and scalable networking, security, collaboration, and datacentre solutions. Our Cisco portfolio spans Catalyst networking, SD-WAN, Meraki cloud-managed IT, Webex collaboration, and Cisco Secure technologies. With deep engineering expertise and proven delivery capability, we design, deploy, and support modern infrastructure aligned to Cisco best practices. Our UK-based NOC provides 24x7 monitoring, incident response, and lifecycle management, ensuring performance, reliability, and continuous optimisation. Cisilion enables organisations to modernise operations, enhance user experience, strengthen security, and accelerate digital transformation through end-to-end Cisco solution lifecycle services.

Why Choose Cisilion

- Extensive Microsoft certifications and real-world transformation experience across public and private sectors.
- Full lifecycle delivery: consultancy through to managed services.
- Outcome-focused engagements with business alignment, user experience, security-first principles, and robust governance.
- UK-based expertise and compliance with strict regulatory requirements.

Cisilion is among the few UK partners to hold both Cisco Gold accreditations, supported by continuous skills development and regular audits. Additional specialisations include Advanced Collaboration, Data Centre, Enterprise Networks, Security, Video, WebEx, Cloud Services, and Application Centric Infrastructure.

Reasons to Choose Cisilion

- 1 of 2 Cisco FSO Managed Service Providers in EMEA
- Top 5 Cisco Certified Managed Service Provider in the UK
- Highly skilled teams with proven project delivery and service management
- Seamless supplier accountability and long-term trusted partnerships
- Comprehensive accreditations and strong client references
- Expert incident resolution via our ITIL-based service centre
- Holistic support from accredited pre-sales, consultants, and professional services teams

3. Service Overview

Service Overview

Cisilion's FinOps Reporting service provides visibility, analysis, and optimisation of Microsoft Azure and Microsoft 365 costs. It delivers tailored dashboards, monthly reports, and actionable insights to improve cost transparency, identify savings, and align cloud expenditure with business priorities.

Service Scope

Included Components:

- Azure FinOps consumption and optimisation reports
- Budget vs. actual tracking across Azure resources
- Key metrics: total spend, forecast, top cost contributors
- Microsoft 365 licence usage analysis and optimisation
- Monthly reporting aligned to service review cycles
- Incident, request, and change workflows via ITIL-aligned processes

Customer Responsibilities:

- Provide appropriate Azure access permissions
- Review reports and participate in regular FinOps sessions
- Maintain tagging and naming standards across resources

Exclusions:

- Remediation of optimisation recommendations unless Manage Level
- Management of non-Azure cloud platforms
- Custom development of automation scripts

Service Features

- Azure cost analysis with proactive insight reporting
- Consumption trend tracking and utilisation dashboards
- Monthly FinOps reporting aligned to review cycles
- Optimisation recommendations based on usage
- Microsoft CSP integration for billing visibility
- Microsoft 365 consumption dashboards aligned to FinOps best practice

Benefits

- Improves cost transparency and financial governance

- Identifies cost-saving opportunities and optimisation actions
- Aligns cloud spend with business priorities
- Supports budgeting and forecasting accuracy
- Enables proactive management of Azure and Microsoft 365 resources

Delivery Model

- Remote service delivery
- Support hours aligned to contracted React / Monitor / Manage tiers
- Secure delegated access models for service execution

Compliance & Standards

- ITIL-aligned processes for incident, request, and change management
- ISO27001 and GDPR compliance for data handling
- Integration with Microsoft Secure Delegated Administration for CSP services

Service Overview

Cisilion's FinOps Reporting service provides visibility, analysis, and optimisation of Microsoft Azure and Microsoft 365 costs.
