2. Cisilion Business Overview

Cisilion is a UK-based technology consultancy and managed services provider, founded in 2000. Initially built on Cisco and Microsoft solutions, Cisilion now delivers IT services across 70 countries and five continents, holding Cisco Gold Integrator and Provider status for over 18 years.

Cisco Business Overview

Cisilion is a long-standing Cisco Gold Partner delivering secure, scalable, and high-performing network, collaboration, and datacentre solutions. Our Cisco proposition spans campus networking, SD-WAN, Meraki cloud management, security, contact centre, and collaboration platforms including Webex and Cisco Unified Communications. We combine deep engineering expertise with proven consulting, project delivery, and ITIL-aligned managed services to help organisations modernise infrastructure, enhance security, and improve user experience. Cisilion's UK-based NOC and SOC provide proactive monitoring, incident management, and lifecycle governance across Cisco technologies, ensuring reliability, resilience, and continual optimisation for public and private sector customers.

Microsoft Business Overview

As a longtime Microsoft Solutions Partner, Cisilion specialises in designing, deploying, and supporting secure, modern digital workplaces. We help organisations maximise their Microsoft investments, enhance productivity, strengthen security, and modernise operations through deep technical expertise, ITIL-aligned managed services, and robust delivery capability.

Microsoft Proposition

We offer an end-to-end Microsoft portfolio covering:

- Modern Work: Collaboration, communication, and governance via Microsoft 365, Teams, SharePoint, OneDrive, Intune, Autopilot, and Viva.
- Intelligent Cloud & Infrastructure: Azure cloud design, migration, optimisation, networking, backup, and business continuity.
- Enterprise-Grade Security: Integrated Microsoft security, Sentinel SIEM, Entra ID, compliance, and governance solutions.

Cisco Proposition

Cisilion is a Cisco Gold Partner delivering secure, resilient, and scalable networking, security, collaboration, and datacentre solutions. Our Cisco portfolio spans Catalyst networking, SD-WAN, Meraki cloud-managed IT, Webex collaboration, and Cisco Secure technologies. With deep engineering expertise and proven delivery capability, we design, deploy, and support modern infrastructure aligned to Cisco best practices. Our UK-based NOC provides 24×7 monitoring, incident response, and lifecycle management, ensuring performance, reliability, and continuous optimisation. Cisilion enables organisations to modernise operations, enhance user experience, strengthen security, and accelerate digital transformation through end-to-end Cisco solution lifecycle services.

•

Why Choose Cisilion

- Extensive Microsoft certifications and real-world transformation experience across public and private sectors.

- Full lifecycle delivery: consultancy through to managed services.
- Outcome-focused engagements with business alignment, user experience, security-first principles, and robust governance.
- UK-based expertise and compliance with strict regulatory requirements.

Cisilion is among the few UK partners to hold both Cisco Gold accreditations, supported by continuous skills development and regular audits. Additional specialisations include Advanced Collaboration, Data Centre, Enterprise Networks, Security, Video, WebEx, Cloud Services, and Application Centric Infrastructure.

Reasons to Choose Cisilion

- 1 of 2 Cisco FSO Managed Service Providers in EMEA
- Top 5 Cisco Certified Managed Service Provider in the UK
- Highly skilled teams with proven project delivery and service management
- Seamless supplier accountability and long-term trusted partnerships
- Comprehensive accreditations and strong client references
- Expert incident resolution via our ITIL-based service centre
- Holistic support from accredited pre-sales, consultants, and professional services teams

3. Service Overview

ITIL Aligned Cloud & Network Support Service

1. Service Overview

Cisilion provides a fully ITIL-aligned support service covering cloud and network estates, delivering ongoing operational management, incident response, problem analysis, change enablement, monitoring, patching, vulnerability management, reporting, and service governance. The service operates against an agreed in-scope asset list and defined Service Levels to ensure predictable, secure, and reliable operations across hybrid, cloud, datacentre, and network environments. Cisilion's UK-based support organisation combines experienced engineering teams, proven operational processes, and proactive monitoring capabilities to improve resilience, reduce risk, and maintain service continuity.

2. Service Objectives

- Maintain availability and stability of cloud and network platforms
- Provide rapid response and resolution aligned to defined SLAs
- Reduce operational risk through structured patching and vulnerability management
- Ensure controlled change through ITIL-aligned governance
- Provide proactive monitoring to detect and resolve issues before impact
- Deliver transparency through reporting, service reviews, and KPIs
- Support business outcomes through continual improvement initiatives

3. In-Scope Assets & Environments

3.1 Cloud Infrastructure

- Azure resources including VMs, storage, networking, and identity integrations
- Hybrid cloud components such as Arc-enabled servers and connectivity services
- Cloud management, security, and monitoring platforms

3.2 Network Infrastructure

- LAN including access, distribution, and core switching
- WAN / SD-WAN and internet edge infrastructure
- Wireless infrastructure
- Firewalls and security devices
- Load balancers and supporting network services

3.3 Supporting Components

- Virtualisation platforms

- Monitoring and logging systems
- Backup and resilience services
- Identity and access services (Entra ID dependencies)

4. Service Components

4.1 Incident Management

- ITIL-aligned triage, diagnosis, escalation, and restoration
- Priority assignment based on business impact and urgency
- Vendor coordination with Microsoft, Cisco, and hardware vendors
- Major Incident Management for P1 outages
- Post-incident reviews where applicable

4.2 Problem Management

- Root cause analysis for recurring issues
- Known error identification and tracking
- Trend analysis and proactive recommendations

4.3 Change Enablement

- Standard, Normal, and Emergency changes
- Impact and risk assessment
- Back-out and validation planning
- CAB governance and scheduling

4.4 Monitoring & Event Management

- 24x7 or 8x5 monitoring (contract dependent)
- Automated alerting and thresholds
- Health and performance dashboards
- Proactive remediation where applicable

4.5 Patch Management

- OS, firmware, cloud, and network patching
- Patch cycle planning and risk assessment
- Compliance reporting
- Maintenance window coordination

4.6 Vulnerability Management

- Review of CVEs, PSIRTs, and cloud alerts

- Risk-based prioritisation and remediation
- Integration with change and patch workflows

4.7 Reporting & Service Management

- Monthly reporting and KPIs
- Incident, change, and problem analytics
- SLA dashboards and compliance review
- Quarterly service reviews and CSI roadmap

5. Service Deliverables

- Managed Incident, Problem, Change, and Event workflows
- Proactive monitoring and alert handling
- Monthly reports and KPI dashboards
- Quarterly service reviews and CSI actions
- Updated in-scope asset list and configuration documentation
- Patch and vulnerability compliance reporting
- Vendor escalation and coordination

6. Roles & Responsibilities

Cisilion Responsibilities

- Operate ITIL-aligned operational processes
- Maintain monitoring, ticketing, and reporting systems
- Provide qualified engineering resources
- Ensure secure handling of data and access
- Deliver proactive recommendations and improvements

7. Customer Responsibilities

- Provide access to systems and SMEs
- Maintain accurate asset information
- Approve changes and maintenance windows
- Communicate business impact for incident prioritisation
- Maintain third-party support agreements where required

8. Service Levels (SLA/XLA)

	Definition	Response	Restoration Target
P1	Critical outage impacting major events	30 minutes	Continuous effort
P2	Major degradation with high impact	1 hour	8 business hours
P3	Incident with workaround	4 business hours	3 business days
P4	Minor request / question	1 business day	As scheduled

9. Onboarding Process

- Kick_off & service validation
- Discovery & baselining of in_scope assets
- Access, tooling, and monitoring configuration
- Runbook creation & operational readiness
- SLA and governance framework confirmation
- Go_live & transition to BAU support

10. Exclusions

- New solution design or deployment projects
- Application_level support
- Unsupported or end_of_life hardware/software
- Custom development or non_standard integrations

11. Optional Add_On Services

- Enhanced 24x7 coverage
- Dedicated SDM or TAM
- Security monitoring & SIEM/SOC services
- Cloud optimisation & architectural consulting
- DR/BCP readiness testing

Appendix A. Cisilion Overview

Cisilion offers market-leading companies a dynamic partnership that is responsive to their needs in the long term. Our bespoke technology services and solutions allow our clients to gain a competitive advantage.

Transformation goes beyond simply introducing technology updates and solutions. It is an expansive service that reimagines a more resilient, flexible, and digitally focused future and actively works to achieve it.
