1. Service detail

1.1. Service Description

Microsoft Dynamics 365 Supply Chain Management is a powerful solution designed to optimise supply chain operations through a comprehensive suite of tools that enhance efficiency and effectiveness. It provides end-to-end visibility across the supply chain, allowing organisations to monitor processes in real-time and make informed decisions that improve responsiveness to changing market demands. By integrating advanced technologies such as artificial intelligence and predictive analytics, the platform enhances demand and supply planning, enabling accurate forecasting and optimal resource allocation. It streamlines warehouse management by facilitating inventory tracking and automating order fulfilment, which boosts operational efficiency. Additionally, Dynamics 365 promotes collaboration with suppliers, ensuring seamless communication and alignment on objectives. A strong focus on demand planning helps organisations align inventory levels with anticipated needs, reducing excess stock and minimising shortages. With an emphasis on quality control and compliance, the solution includes robust reporting capabilities, customisable reports, and built-in dashboards that provide valuable insights into supply chain performance. Overall, Dynamics 365 Supply Chain Management equips organisations with the necessary tools to build resilient, agile supply chains that can adapt to evolving needs and demands, driving continuous optimisation and strategic growth.

Figure 1: Microsoft Dynamics 365 Supply Chain Management

EY offers a comprehensive range of services to help public sector organisations transform their supply chain with Microsoft D365 Supply Chain Management, structured around three key pillars:

- ▶ **Humans@Center:** Enhances employee engagement and adoption of Microsoft D365 Supply Chain Management through organisational change services, including leadership alignment, change management, communication, training, and business readiness.
- ▶ **Technology@Speed:** Focuses on the rapid design and deployment of Microsoft D365 Supply Chain Management, providing services such as program governance, solution architecture, security strategy, solution configuration, data migration, and post-implementation support to ensure a robust and scalable solution.
- ▶ **Innovation@Scale:** Encourages organisations to challenge traditional boundaries and implement transformative changes to their business models, supported by services like capability assessments, business case development, and end-to-end business process definition.

To deliver these services, we:

- ▶ Connect specialists from different service lines to form multi-disciplinary teams with leading capabilities.
- ▶ Leverage transformative solutions, industry insights, and technology.
- ▶ Collaborate with a category-leading ecosystem of alliances to provide the necessary technology and insights.

What are the benefits of our service

- ▶ **Enhanced organisational readiness and user adoption of Microsoft D365 Supply Chain Management**, enabled through our structure Humans@Center approach.
- ▶ **Accelerated implementation of Microsoft D365 Supply Chain Management** through a proven delivery approach that prioritises rapid design, configuration, development, testing and deployment
- ▶ **Reduced business risk through a robust, scalable, and future ready solution** supported by our comprehensive programme assurance and technical principles of adopt standard for a clean core.
- ▶ **Insight driven transformation**, powered by EY's public sectors industry experience, transformative solutions and deep technology knowledge
- ▶ **Strengthened innovation capability**, enabling the organisation rapidly to ideate, test and deploy new operating models and end to end processes that permits the finance function to deliver value added services to its business partners.

Our service features

- ▶ **Enhanced Visibility and Control:** Provides real-time visibility into inventory, production, and warehouse processes, helping organisations make informed decisions and react quickly to disruptions.
- ▶ **Streamlined Operations:**
 - ▶ Integrates procedures across procurement, manufacturing, and delivery, minimising inefficiencies and achieving seamless workflows.
 - ▶ Automates routine tasks and workflows using copilot and agentic AI, reducing manual effort and improving accuracy.
- ▶ **Inventory Optimisation:**
 - ▶ Advanced tools help manage stock levels efficiently, preventing understocking or overstocking and reducing holding costs.
 - ▶ Insights from demand forecasting enable better planning and inventory replenishment.
- ▶ **Improved Collaboration:** Connects suppliers, manufacturers, warehouses, and distributors, ensuring all stakeholders work together seamlessly.
- ▶ **Advanced Analytics:**
 - ▶ Built-in AI and reporting tools deliver actionable insights and predictive analytics, improving decision-making across the supply chain.
 - ▶ Organisations can leverage tools like Power BI for customised reporting and trend analysis.
- ▶ **Reduced Operational Costs:** Integrated processes and automation significantly cut down on operational delays and cost inefficiencies.
- ▶ **Resilient Supply Chain:** Aids in building a resilient supply chain by supporting proactive mitigation of risks such as supplier delays and sudden demand changes.

- **Scalability:** Designed to scale as organisations grow, accommodating increasing complexity and volume without performance issues.

1.2. Engagement Approach

The EY engagement philosophy is one of open exchange which breeds mutual trust in a solutions partnership which may be expected to last many years into the future. We believe that organisations will find EY a refreshingly different technology partner, and one that acknowledges the fact that the human challenges of any major project typically outweigh the associated technical challenges.

Based upon this principle, an EY engagement is consciously one of close and regular personal interaction and focus is given to the nature, staffing and operational goals of your business over and above technology considerations. This regular, open dialogue means that our consultants can make well-informed recommendations in the specific context of an organisation. It also means that they are able to challenge assumptions and historic ways of working.

Our experienced and professional implementation teams follow an established project management methodology for both Agile or Waterfall approaches and can make recommendations on the most appropriate, based on your preference, requirements and capability. We work in partnership collaboratively with you throughout all stages to ensure user adoption and measurable benefits are achieved.

1.3. Implementation Approach

The EY approach is scalable, flexible and set on managing project constraints and expectations.

Based on client requirements, EY will employ one of two industry standard offerings: Waterfall or Agile.

Waterfall	Agile
► Scope and deliverables locked ► Time and cost more predictable ► Full design / technical documentation ► Less resource intensive for client ► Fully managed implementation ► Managed 'stages' requiring approval ► Full plan: start, middle, end	► Flexibility on deliverables and end goal ► Client Agile maturity and experience required ► High levels of collaboration required ► Dedicated resource(s) working to a fixed capacity ► Single Client product owner required providing direction ► Rapid decision making essential ► Configuration focus not documentation

Figure 2 - Waterfall vs. Agile Methodology

The Waterfall approach utilises the methods and principles from the internationally recognised standard of PRINCE2 (Projects IN Controlled Environments).

Figure 3 - Waterfall Methodology

The Agile approach is focused around a 'Minimal Viable Product' (MVP) methodology, whereby the client dictates the priority, order and direction of the project via defined Sprints using one team. This is centred on rapid development and iterative cycles maximising configuration over development. It concentrates on working with the product(s) as much as possible over design, documentation, and specification.

Figure 4 - Agile Methodology

1.4. Client responsibilities

The client is responsible for the following:

- ▶ Acquisition of any required Microsoft application subscription licenses (which EY can advise on), to enable the service that EY will be implementing, supporting, or training the client on
- ▶ Provision of any relevant test data required by EY
- ▶ Provision of resources for User Acceptance Testing as advised by EY, and that these staff are not technical staff involved in the development, but end users/subject matter experts who were involved in the user requirements definition phase
- ▶ For any integration services to back-office applications, it is assumed that the client will have the required APIs available on all the deployed CRM instances (i.e. Development, Test, and the Production), and give EY access to any available documentation for those APIs
- ▶ Provision of equivalent instances for the relevant back-office systems and make these available at no cost to EY
- ▶ Availability of staff with detailed technical know-how in the back-office applications to input into any integration services implementation, whether from the client, or from the back-office application vendor, and have support arrangements in place with that vendor for technical support
- ▶ Provision of remote access to any relevant back-office applications as required

1.5. Application Support Services

EY have a dedicated Application managed services team to support Microsoft technologies we deliver, providing seamless transition from delivery to business as usual. Our Application Managed Services empowers organisations to mitigate operational, financial, and reputational risks associated with system issues through our highly responsive issue resolution services and proactive system monitoring for Microsoft solutions.

As an extension of your team, our dedicated application support professionals collaborate closely with you to ensure that your business is always operating at peak efficiency and is consistently supported.

EY adheres to the rigorous standards of the Information Technology Infrastructure Library (ITIL), integrating ITIL best practices within our Microsoft Dynamics 365-based IT Service Management (ITSM) tool. We offer comprehensive support across the following critical areas:

- ▶ Incident and Problem Management
- ▶ Service Requests
- ▶ Change Management
- ▶ Release Management

Our processes are grounded in industry standards and continually refined over many years to ensure simplicity, clarity, and systematic execution. We are committed to transparency, sharing our approach in detail with our clients to enable effective collaboration and to ensure that we achieve mutually agreed objectives.

Moreover, our application support team assists organisations in understanding, evaluating, and implementing the latest Microsoft features, thereby maximising your technology investment and enhancing user experiences across your enterprise.

1.6. Support Features

EY helps organisations reduce the operational, financial and reputational risks of any system issues, by providing highly responsive issue resolution and proactive system monitoring for Microsoft solutions. Acting as an extension of your team, we are there to make sure your business is always supported, whether you're looking to take advantage of a new feature, or if things aren't working as they were the night before. Our EY application support teams help organisations understand, assess and implement the latest features from Microsoft to increase the value of your investment and drive better experiences for your users.

Our support offerings at a glance:

- Built using Information Technology Infrastructure Library (ITIL) best practice
- Fast and responsive incident resolution
- Response and resolution SLAs
- Problem management for ongoing issues
- Service request delivery
- Established co-development framework
- Service Delivery Manager to ensure service quality
- Packages tailored to your specific needs
- Quick access to Microsoft expertise and knowledge
- Continuous system insight and improvements
- Option to add additional service uplifts, such as 24/7 coverage
- On-shore-based support, with options to increase the scale and flexibility of support with off-shore or blended delivery

We have adopted a flexible approach to our support packages so that we can deliver a service tailored to suit you. We offer a range of off-the-shelf packages and bespoke support options to meet your needs. Detailed overviews of each support package and additional service uplifts are available on request.

1.7. Pricing

This service is priced in accordance with the SFIA rate card provided and can be modelled using a range of commercial approaches e.g. time & materials, fixed price, etc. EY is also able to provide off-shore and near-shore pricing at reduced rates. 'Ordering and Invoicing' and 'Termination' are to be undertaken in accordance with G-Cloud 15 contract terms unless varied by mutual agreement and detailed within a call-off contract.

2. EY Microsoft Alliance

The EY organization leverages Microsoft technology to create transformative solutions across its service lines, including Assurance, Tax, Consulting and Strategy and Transactions. These solutions empower clients to achieve significant transformational outcomes, enhancing their agility, fostering innovation and equipping them to effectively respond to disruptions.

- ▶ Data and Artificial Intelligence (AI) capabilities that drive business-led transformation with humans at center
- ▶ Repeatable enterprise solutions that help enable key business functions
- ▶ Sector-led solutions that address industry challenges

The EY-Microsoft Alliance designs and helps deliver transformative cloud solutions powered by business ingenuity that helps create long-term value. The EY organization and Microsoft bring a compelling formula to spark the potential of the cloud and unlock the power of data. We solve clients' most challenging issues by blending trusted industry knowledge with innovative cloud technology. This strategic relationship draws on decades of success developing visionary solutions that provide lasting value. Together, we empower organizations to create exceptional experiences that help the world work better and achieve more.
