1. Service detail

1.1. Introduction to the Service

- 1.1.1. **BI Solution Architecture:** organisations need to quickly drive insight from data that is scattered across multiple sources, systems and/or is not digitised (and therefore not leveraged). EY helps organisations design and deploy their BI function.
- 1.1.2. **Dashboarding & BI Implementation:** organisations require fast and easy ways to implement dashboards and visualisations to unlock the value of their data enabling data-driven decision making. EY offers rapid dashboard development and implementation.

1.2. Service Description

BI Solution Architecture

- EY assist in the translation of the requirements into a mature IT design of business intelligence function and architecture stack
- The solution is 'made-to-measure' as the team is tool agnostic and is experienced in a number of technologies including:
 - **Knowledge sharing** – SharePoint
 - **Database tools** – SQL on premises, SQL Cloud, Hadoop, PostgreSQL, SQL Server, MS Access
 - **Scripting and programming languages** – Python, R, .Net
 - **Data visualization tools** – Power BI, Tableau, Spotfire
 - **Workflow tools** – Alteryx
- The team's ability to work across multiple technologies allows for a comprehensive assessment of an organisation's technology stack and for the deployment of the appropriate data collection, consolidation, and construction process
- Our deliverables include visual wireframes, logical data model design, data dictionaries, tools assessments and IT deployment roadmaps

Dashboarding & BI Implementation

- We develop 'made-to-measure' operational dashboards covering all layers of client's organisation. Our team is tool agnostic and is skilled in a number of dashboarding technologies (e.g. Power BI, Tableau, QlikView, Spotfire and MicroStrategy), and supporting data handling tools (e.g. Data Factory, SQL Server, Tableau Data Prep, Alteryx, Talend, Copilot Studio, Power Apps and Power Automate)
- We enable Power BI integration in Microsoft PowerApps to further enhance and automate the visibility of the client's operations by allowing a direct interaction (add, edit, delete) with both business and external data
- We offer both in-house deployment and EY hosting setup, which is rapid, lightweight and with no dependency on client IT. We have the ability to deploy within a two week timeframe and provide online hosting.
- Use our BI offering to:
- Enable fact-based decision making based on best available data

- Build capability to enable consistent actionable insights and transform single insight into business-as-usual solution
- Reduce costs of repetitive data analysis

EY | Building a better working world

About EY

EY exists to build a better working world, helping to create long-term value for clients, people and society and build trust in the capital markets.

Enabled by data and technology, diverse EY teams in over 150 countries provide trust through assurance and help clients grow, transform and operate.

Working across assurance, consulting, law, strategy, tax and transactions, EY teams ask better questions to find new answers for the complex issues facing our world today.

EY refers to the global organisation, and may refer to one or more, of the member firms of Ernst & Young Global Limited, each of which is a separate legal entity. Ernst & Young Global Limited, a UK company limited by guarantee, does not provide services to clients. Information about how EY collects and uses personal data and a description of the rights individuals have under data protection legislation are available via ey.com/privacy. EY member firms do not practice law where prohibited by local laws. For more information about our organisation, please visit ey.com.

Ernst & Young LLP

The UK firm Ernst & Young LLP is a limited liability partnership registered in England and Wales with registered number OC300001 and is a member firm of Ernst & Young Global Limited.
