12 month to 3 year options available for:

- Imprivata Enterprise Access Management (formerly Imprivata OneSign)
- Imprivata Medical Device Access Management
- Imprivata Mobile Access
- Imprivata Privileged Access Management

2. Overview

Imprivata has a strong understanding of healthcare's unique IT requirements and offers a broad portfolio of advanced, healthcare-specific solutions that have been successfully deployed worldwide. Imprivata Enterprise Access Management (formerly known as Imprivata OneSign) provides secure and convenient access to electronic patient and health records (EPRs) so clinicians can focus on patient care, not technology. With over eight million clinicians using EAM as their preferred solution for single sign-on and virtual desktop access, Imprivata is the recognised digital identity company for healthcare.

Increase clinician satisfaction, protect patient data

Imprivata Enterprise Access Management (EAM) enables healthcare organisations to leverage the full benefits of their technology investments, by building transparent, seamless, and convenient security into clinical workflows that streamline the clinicians' experience. By removing barriers that frustrate and distract care givers, like repetitive manual logins and complex passwords, EAM saves clinicians valuable time and increases user satisfaction. In summary, EAM:

- Streamlines clinical workflows by delivering No Click Access® to clinical and administrative applications, including those on-premises and in the cloud. With just a tap of a badge or swipe of a fingerprint, clinicians are instantly logged into their desktop and automatically signed into their applications without typing a single username or password.
- Protects patient data and helps healthcare organisations meet data protection compliance requirements by preventing credential sharing, securing sensitive patient information on unattended workstations, and enabling easier and more thorough auditing and reporting of workstation and application access.

90% Of manual authentication steps can be removed from mobile workflows

99% Of unauthorised access to sensitive patient data can be automatically identified

70% More clinical time can be saved by streamlining access management

Benefits for the NHS?

- Provides fast, secure access to patient information for every major electronic patient record (EPR)
- Replaces passwords, improves security, and supports data protection compliance requirements
- Enables fast, secure access into on-premises or cloud applications for all users from any device, anywhere
- Offers the industry's broadest native thin and zero client integration
- Saves clinicians 45 minutes per shift

Imprivata can;

- **Optimise your EPR**
- **Unlock the Power of Mobile**
- **Improve Workflow Efficiency**
- **Protect Patient Privacy**
- **Streamline Regulatory Compliance**
